Lancaster Farming

Vol. 19 No. 25 | Lancaster Farming, Saturday, May 4, 1974 | $2.00 Per Year

Steve Arbaugh won the annual Lancaster County 4-H conservation project contest held Tuesday night at the Farm and Home Center. For his project, shown here, he compared the growth rates of corn planted in different soil types. (See Story on Page 17.)

# Dairy Health Project Seeks Farmer Funds

A new approach to solving Pennsylvania's annual $42 million dairy herd helath problem was unveiled Wednesday afternoon in Harrisburg. Under a plan proposed by a dairy herd health task force, individual dairymen and their associations will be asked to contribute funds directly to an interdisciplinary research team at Penn State. The task force is seeking $18,000 from dairymen this year to help pay for the estimated $45,000 project cost.

The task force is chaired by A. F. Kish, of Elizabethtown College, and includes among its members R. J. Flipse, assistant dean of Penn State's College of Agriculture. Kish told a small group representing various dairy organizations, extension, farm publications and individual farmers that the task force arose out of need to find a better way to solve herd health problems.

"Herd health is a costly problem," he told the group, "and no one discipline can hope to find the best solution. Penn State has been working on dairy herd health, but they've been doing the job without adequate funding. They are presently working with 15 healthy herds, but they want to do more work with unhealthy herds. That's where our task force enters the picture.

"We can't get any more money from the state or federal governments for the kind of research we feel is most needed. So we're approaching the feed and fertilizer dealers, pharmaceutical manufacturers, veterinary groups, seed and limestone dealers and individual dairy farmers. We figure this is at least a three-year project, and each year will cost $45,000.

"So far," Kish said, "the

# Pennfield Buys Nutrena Plant

Robert Graybill, president of Pennfield Corporation, announced today, Saturday, the purchase of the manufacturing facility and feed business of Nutrena Feeds Division of Cargill, Inc. The Nutrena plant and business, located in Palmyra, Pa., was sold to Pennfield for an undisclosed sum in an agreement between Graybill and David O. Wentzell, Minneapolis, vice president and general manager of Nutrena.

Graybill said the local acquisition enables Pennfield to increase production in order to better serve their existing customers, and at the same time expand their feed availability to more producers in the regional market area. He said it also gives Pennfield the opportunity to merchandise products through more dealers.

Included in the purchase is Cargill's Controlled-Release Liquid Supplement which will be provided for Pennfield's dairy and beef cattle customers. Nutrena, according to Wentzell, will also continue to market the Contolled-Release Liquid Supplement under its exclusive patent rights.

Graybill, in his statement, said that he expects the Nutrena purchase would enable Pennfield to serve farmers in this area in a better, smoother and more efficient manner.

# Getting Started in the Wine Grape Business

Could wine grapes become Lancaster County's biggest cash crop? Some say yes, and some say maybe. But nobody says "Yes" with more enthusiasm than Howard Miller, Strasburg RD1.

Miller is so enthused, in fact, that he's just completed planting vines on 10 acres of recently purchased land on a hillside within sight of the Susquehanna. "There are 10,000 acres of grapes in Erie County," Miller said. "Here in Lancaster County we could have five to ten times that much acreage. I think Pennsylvania could become as important to the wine industry as the Nappa Valley in California."

While he is new to viticulture, the science of growing grapes, Miller is no stranger to the grape industry. Two years ago, Miller left his job as an advertising manager at Armstrong Cork Co. to become marketing manager for Keystone Foods, a grape growers cooperative headquarters in the Erie County town of North East. Six months ago, the Miller family moved back to Lancaster County, partly to start an advertising business, and partly to start a vineyard. He also publishes the Southeast Grape Letter for vineyardists. More information on the newsletter can be had by writing to Miller at Box 373, Bunker Hill Road, R.D.1, Strasburg, 17579.

Two weeks ago, Miller donned coveralls and climbed onto the seat of a rented planter. While a helper, Charles Hess, handed roots to him, Miller planted a grape vine every seven feet. If everything goes according to plan, Miller will harvest his frist crop in 1976. And it's quite possible that the vines he planted will still be bearing fruit as the nation observes its 200th anniversary.

Three hybrid grape varieties were included in the root stocks which Miller bought from a New York nursery. There are Chancellor, de Chaunac and Chelois, all of which, Miller feels, can make a good marketable red wine. About a third of his acreage went into each variety.

Miller shied away from the native labrusca grape varieties, like Concord, because they do not make a very fine wine. Most of Erie County's vineyards are planted to Concord, which are sold as table grapes or for grape juice. Although they have shortcomings as

[Continued on Page 24]

With a capable assist from Clarence Hess, left, Howard Miller tries his hand at planting grape vines. Miller, who operates a local advertising agency, is one of Lancaster County's newest wine grape growers, and hopes to harvest his first crop in 1976.

# FARM TRENDS by Dick Wanner

### Clean and Green Goes to Senate

The Pennsylvania State House of Representatives voted Tuesday to pass House Bill 1056, the so-called clean and green law designed to provide tax relief for Commonwealth farmers. The bill's final version calls for a 10-year tax rollback, a 10-acre or $2000 minimum gross to qualify for an agricultural use classification, and a 10-acre per year splitoff provision. The bill was hammered out in over a year of debate. Environmentalists and the Pennsylvania Grange still oppose the 10-acre per year splitoff provision, claiming that it will cripple the intent of the bill. If the Senate acts quickly on the bill, it could become law by mid-June, since there is reportedly no present possibility of a veto by Governor Shapp.

# New York Dressed Meats

**Thursday, May 2**

Daily Distributive, less than carlot meat trade.

Compared with Wednesday, steer and heifer beef mostly 50 cents lower. Veal, calf and lamb generally weak, pork loins fully $1.00 lower, Picnics and Hams fully $2.00 lower, Butts and spareribs steady.

Beef movement disappointingly slow from wholesalers standpoint with chucks and rough cuts draggy. Demand mainly piecemeal for small stock classes and pork, however, lamb chucks getting first call while pork butts and spareribs fairly active.

**Steer Beef**

Prime 600-900 pounds 68.00-69.50; Choice 600-700 67.00-69.50; 700-800 65.50-67.50; 800-900 64.00-65.50; Good 500-800 66.00-68.00.

**Heifer Beef**

Choice 500-700 pounds 67.00-68.50.

**Calf 150-350 pounds**

Choice 88.00-94.00; Good 78.00-86.00; Standard 76.00-80.00.

**Veal**

Choice 90-150 pounds 111.00-115.00; Good 60-90 102.00-107.00; Standard 60-120 88.00-93.00.

**Lamb**

Choice and Prime 30-55 77.00-80.00; 55-65 71.00-74.00; Spring lamb 30-55 82.00-84.00; 55-65 71.00-75.00.

**Choice Beef Cuts**

Hinds(steer) 145-190 pounds 83.00-86.00; arm chucks 90-105 51.00-54.00; ribs (7 rib) 34-40 88.00-92.00; Loins (trmd) 50-70 110.00-112.00; Rounds (steer) 70-95 77.00-81.00; full plates 28.00-30.00; Hinds (heifer) 120-170 84.00-86.00.

**Fresh Pork Cuts**

Loins (regular) 8-14 69.00-72.00; Picnics (regular) 4-8 39.00-42.00; Boston Butts 4-8 50.00-53.00; Spareribs (3 pounds down) 77.00-82.00; Hams (skinned) 14-17 56.00-58.00; 17-20 50.00-53.00.

**Kosher Steer Beef**

Choice and Prime forequarters 56.00-60.00.

## St. Louis Auction

HOGS: 5000.

Barrows and gilts 50-75 lower. US 1-2 200-230 lb. 29.75-30.00; US 1-3 200-230 lb. 29.50-29.75; 230-250 lb. 28.50-29.50.

## Peoria Auction

HOGS: 4500.

Barrows and gilts mostly 1.00 lower.

BARROWS AND GILTS: US 1-2 200-230 lb. 29.50-30.00; US 1-3 200-240 lb. 28.50-29.50.

## Oklahoma City

**Thursday, May 2**

Estimated Receipts 5,000
Same Day Last Week 11,087
Same Day Last Year 16,474

Fairly active, feeder cattle and calves strong to 50 cents higher; Majority receipts Good and Choice 500-900 pound steers and 450-720 heifers; moderate attendance buyers.

FEEDER STEERS: Few small lots and part load Choice 308-460 pound 48.50-50.00; 500-600 41.00-44.50; 600-700 39.00-41.00, largely 39.50-41.00, part load 663 pound at 41.70; 700-800 39.00-41.30; 800-950 38.50-40.85; mixed Good and Choice 400-500 41.00-45.25; 500-700 37.50-40.00; 700-850 37.00-39.25; Good 400-500 38.00-38.50; 500-750 35.50-37.50. Good 564-950 Holstein steers 32.55-35.00.

FEEDER HEIFERS: Few small lots Choice 300-475 pound 37.50-44.80; Choice 500-600 36.50-38.80; 600-718 35.00-37.90; mixed Good and Choice 350-500 35.25-38.25; 500-600 34.50-36.00; Good 450-700 31.50-33.75.

For the Week: Feeder cattle and calves under extreme pressure most of the week with closing sales 2.00-2.50 lower, extremes 3.00 lower on feeder heifers and calves compared to late last week; cows closed 2.00-3.00 lower; bulls steady to 50 cents higher. Salable receipts near 9,800 head compared to 22,430 last week and 20,779 the same week a year ago. Supplies curtailed due to general rains in the marketing area. Slaughter cows 17 percent cattle receipts; feeders 80 percent of total.

## New Holland Dairy Auction

**Wednesday, May 1**

Reported receipts of 70 cows, 11 heifers, and 6 bulls. Market steady with last weeks market.

Load of Luzerne County cows, springers 355-700.

Load of Franklin County cows, fresh 525-1000; springers 755-995.

Load of Pa. cows, springers 650-800.

Locally consigned cows 365-860.

Springing heifers 365-860.

Springing heifers 560-650.

Open heifers 200-375.

Bulls 260-575.

| Checks | 48 lbs. | 30 | 29 |

## Peoria Cattle

Thursday, May 2

CATTLE: Receipts this week: 4300 last week: 3400 Year ago: 3400.

Compared with last week's close, slaughter steers steady to strong. Slaughter heifers week to 50 lower. Cows 1.00-1.50 lower. Bulls steady to weak. Receipts about 75 percent slaughter steers, 15 percent slaughter heifers, balance mostly cows.

SLAUGHTER STEERS: Choice 920-1200 pounds 2-4 40.50-42.50, load 1000 42.75: Choice 1150-1350 3-4 39.00-41.00; Choice and Prime 1200-1300 3-4 39.00-40.50; few loads 1250-1440 4-5 35.00-39.00; mixed Good and Choice 900-1300 39.00-40.50; Standard and Good holsteins 36.00-37.50, few 38.00.

SLAUGHTER HEIFERS: Choice 800-1000 pounds 2-4 40.00-41.25; several loads 41.50-41.75; Choice and Prime 900-1100 3-4 39.00-41.00; mixed Good and Choice 750-1150 38.00-39.00; Good 37.00-38.00.

COWS: Utility and Commerical 26.00-31.00; high-dressing Utility 31.50; Cutter 24.50-29.00; Canner 23.00-24.50.

## Local Grain

Thursday, May 2

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, May 2, 1974 are as follows:

| | Bid+ | Offered+ |
|---|---|---|
| Ear Corn, Old | 72.00 | 80.00 |
| Ear Corn, New | 75.00 | 85.00 |
| Shelled Corn | 2.85 | 3.08 |
| Oats, Local | 1.53 | 1.55 |
| Oats, Western | 1.67 | 1.91 |
| Barley | 2.30 | 2.65 |
| Wheat | 3.66 | 3.95 |
| Soybeans | 5.32 | 5.62 |

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill. will sell for at his mill.

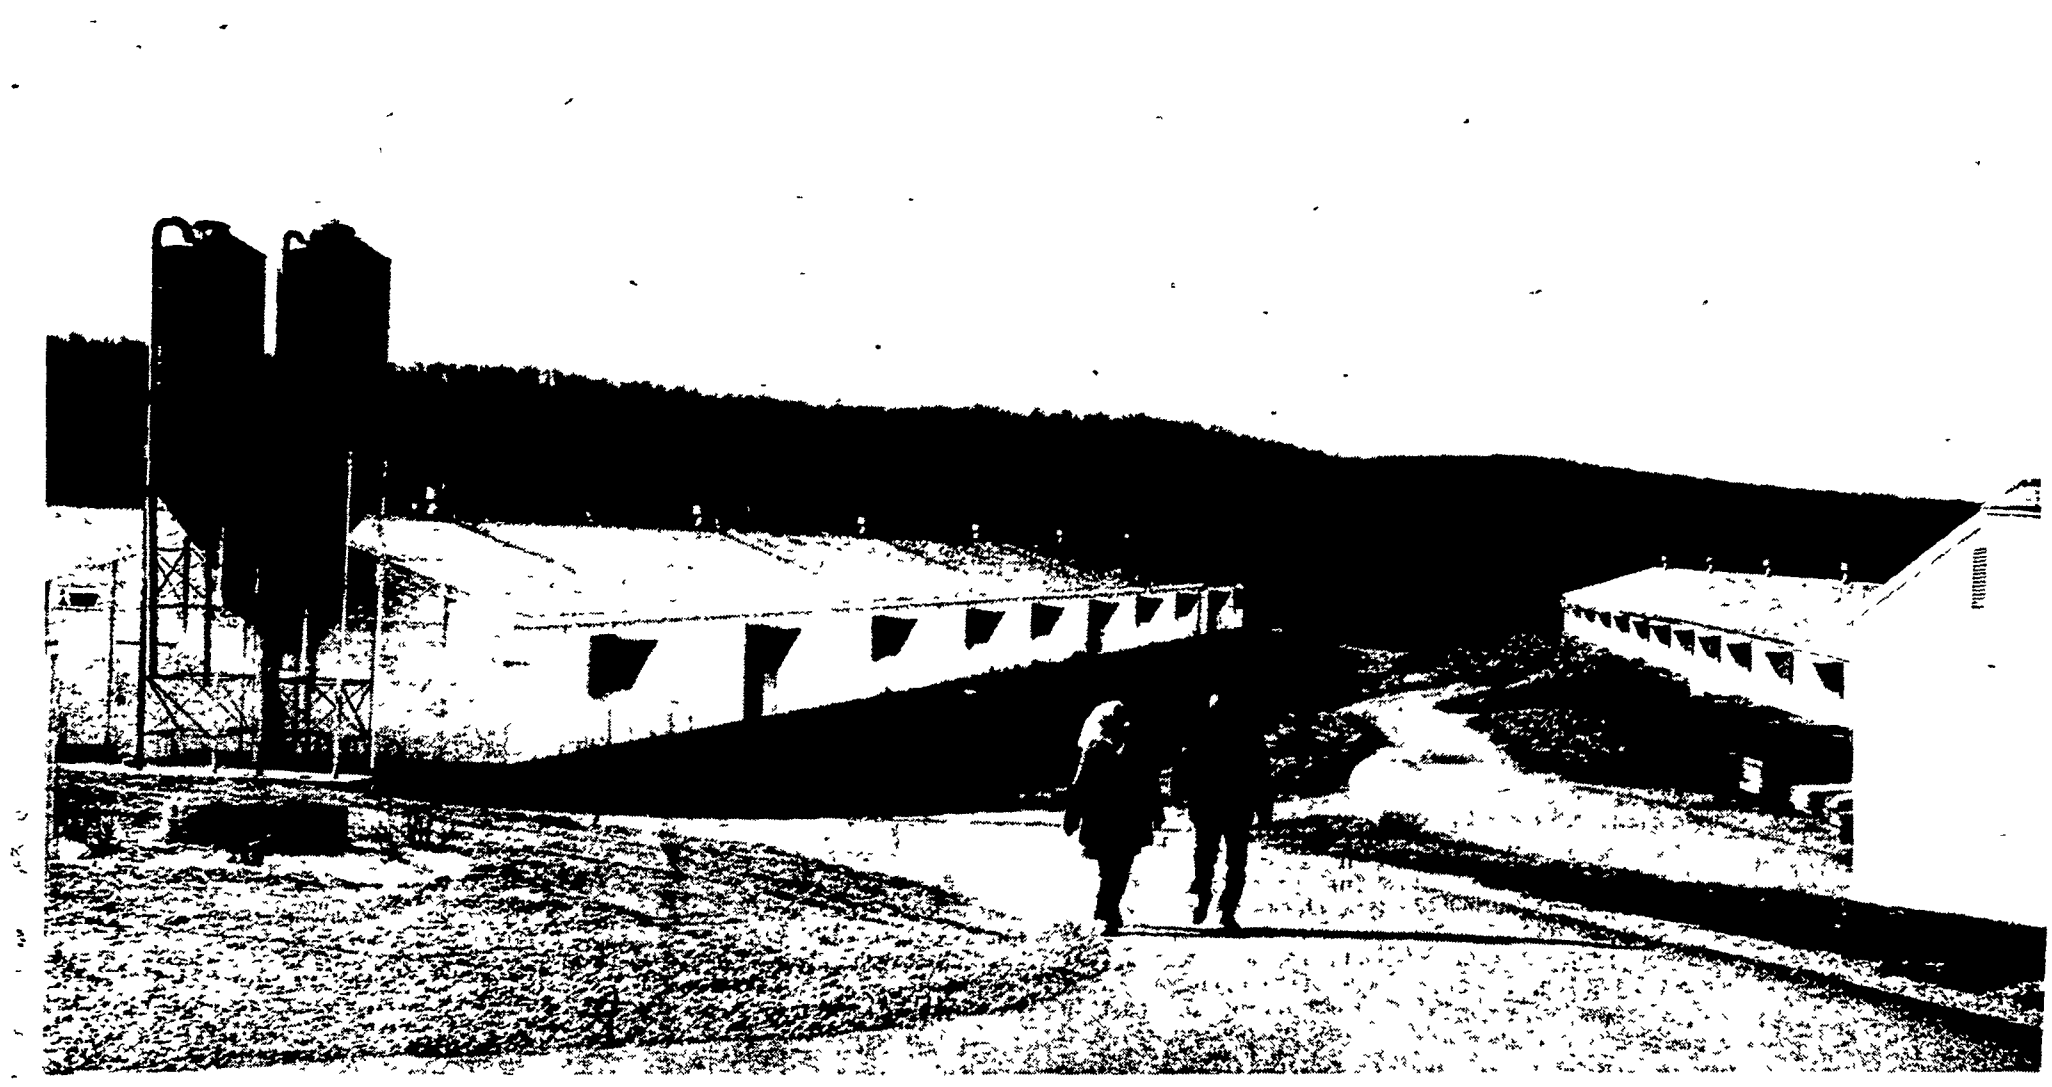
# Pennfield's been keeping my records straight for years



"Pennfield's Computer Flock Analysis is almost like my personal bookkeeping department.

"The monthly computer sheet I get from Pennfield, tells me all the information I need to know to run my poultry operation.

"The accurate and complete records have helped me catch weaknesses in my feeding program, before they've become costly problems.

"In the beginning I used the computer sheet to get credit from the bank. It's so clear, even the bankers could understand it.

"At tax time, I go right to the computer sheet. Pennfield even figures depreciation the same as IRS.

"I could go on, but I think I've made my point."

# THE OLD FARMER'S ALMANAC

MAY 6-12, 1974

**Such chicanery, cool and rainy.**

There are fish and fishing for everyone somewhere now . . . Indian chief, Pontiac, began his blockade of Detroit May 9, 1763 . . . Full Flower Moon May 6 . . . Asparagus time . . . Average length of days for week, 14 hours, 22 minutes . . . Dust storms Okla., Kan., Colo., and Texas this week in 1934 . . . Rain on May 8 means a wet harvest . . . Skunks born this week and bees seek first pollen . . . Germany surrendered 6:01 PM, May 8, 1945 . . . Envy never enriched any man.

**Old Farmer's Riddle:** When can you carry water in a sieve? (Answer below.)

**Ask the Old Farmer:** In the old days, why did they make cheese in round containers, and not square ones? J.P., Washington, D.C.

*Back in the days when folks first learned how to make cheese, there were no square containers. The belief started that a square cheese wouldn't keep well or taste right.*

**Home Hints:** If you don't have a whetstone handy when a knife needs sharpening, try using the rim of a clay flower pot or a crock . . . *Riddle answer.* When it's frozen.

OLD FARMER'S WEATHER FORECASTS

**New England:** Partly clear and cool to start, then heavy rain; rain continuing to end of week.

**Greater New York-New Jersey:** Cloudy and cool at first, then rain; clear and warm latter part.

**Middle Atlantic Coastal:** Warm to start, then rain by midweek; rain, heavy at times, continuing to end of week.

**Southeast Coastal-Piedmont:** Rain all week, heavy at times inland and intermittent along coast.

**Florida:** Clear and hot throughout region most of week except some midweek rain in north.

**Upstate & Western New York-Toronto & Montreal:** Sunny at first, then rain; heavy rain latter part.

**Greater Ohio Valley:** Partly sunny to start, then scattered showers; clear and warm latter part, then rain on weekend.

**Deep South:** Heavy rain at first continuing through midweek; clearing and very warm by end of week.

**Chicago and Southern Great Lakes:** First part of week warm with heavy rain; end of week cool with light rain.

**Northern Great Plains-Great Lakes:** Early week rainy, heavy at times; clearing and very warm at week's end.

**Central Great Plains:** Light rain to start, then clearing; rain again latter part.

**Texas-Oklahoma:** Rain at first, then clear and hot; end of week cloudy then rain on weekend.

**Rocky Mountain Region:** Rain and cold most of week; clearing and warmer on weekend.

**Southwest Desert:** Cloudy and warm to start, then clearing; end of week temperatures in high 80s.

**Pacific Northwest:** Light rain at first, then clearing and warm; showers and warmer latter part.

**California:** Cloudy to start, then rain by midweek; clearing and very warm latter part.

(All Rights Reserved Yankee, Inc., Dublin, N H 03444)

# Pa. Auction Summary

**Weekly Summary**
**19 Livestock Markets**
**Week Ending April 26**

CATTLE: Compared with 6155 head last week, and 6819 head a year ago. Compared with last week's market, slaughter steers uneven, mostly steady to 25 cents lower. Slaughter cows steady to 25 cents lower. Slaughter bullocks uneven. Salughter bulls bully 50 cents lower.

STEERS: High Choice & Prime 42.10-44.25, Choice 41.00-44.00, Good 38.50-42.00, Standard 37.50-41.00, Utility 34.00-38.25

HEIFERS: Few Choice 40.50-43.20, Good 37.25-40.25, Standard 35.50-38.25.

COWS: Utility & High Dressing Cutter 32.60-36.00, Cutters 31.50-34.50, Canners 29.00-32.50, Shells down to 25.00.

BULLOCKS: Choice 41.50-43.50, Good 39.50-42.10, Standard 37.00-40.25, Utility 34.25-38.50.

BULLS: Yield Grade 1-2 1100-2000 pounds 38.50-44.00.

FEEDER CATTLE: Good 300-700 pounds feeder steers 41.00-45.60, Medium 35.50-43.00; Good 300-600 lbs. feeder heifers 39.50-45.00.

CALVES: Compared with 3013 head last week, and 3329 head a year ago. Vealers grading Good & Choice $1 to $2 lower, Utility & Standard fully steady.

VEALERS: Few Prime 71.00-76.00, Choice 65.00-72.00, Good 60.00-68.00, Standard 52.00-63.00, Utility 90-120 pounds 40.00-55.00, 70-85 35.00-42.00.

Farm calves, Holstein bulls 90-120 pounds 43.00-65.00; Holstein heifers 90-140 45.00-79.00; beef cross bulls & heifers 70-110 48.00-83.00.

HOGS: Compared with 7802 head last week, and 6675 head a year ago. Barrows & Gilts 50 cents to $1.50 lower.

BARROWS & GILTS: US 1-2 205-230 pounds 31.50-33.25, 1-3 200-240 29.80-32.00, few to 33.30, 2-3 185-250 28.50-31.50, 2-4 250-300 24.70-30.00, 2-4 120-185 24.60-30.00.

SOWS: US 1-3 320-550 pounds 23.00-27.50, 2-3 320-650 20.00-23.25. Boars 20.00-24.50, few to 26.00.

FEEDER PIGS: Compared with 1052 head last week, and 499 head a year ago. US 1-3 20-35 pounds feeder pigs 14.00-25.00 per head, 1-3 35-50 21.00-28.50, 1-3 60-85 29.50-37.00 per head.

SHEEP: Compared with 371 head last week, and 1535 head a year ago. Spring slaughter lambs $5 to $10 lower. Choice 50-100 pounds spring slaughter lambs 40.50-51.00. Slaughter ewes 12.00-20.00.

# Soil Stewardship Week Set For May 19-26

Soil Stewardship Week, a nationwide observance which emphasizes man's responsibility to protect and conserve soil, water, and other natural resources, will be May 19-26 this year, Aaron Z. Stauffer, Chairman of the Lancaster County Conservation District announced today.

This year's theme, "A Different Place", emphasized "how the many changes now occurring in the nation affect our continuing responsibility to be good stewards of the land," said Mr. Stauffer.

Mr. Stauffer cited the energy shortage, environmental pollution, and the growing concern over land use as examples of changes and developments affecting the use of America's natural resources.

"We hope," said Mr. Stauffer, "that during Soil Stewardship Week, millions of Americans will pause for a moment to consider their responsibilities for the protection and use of the Lord's earth."

The district, upon request, provided local churches with programs, bulletin inserts, and copies of this year's observance booklet. The material was prepared by the National Soil Stewardship Advisory Committee of the National Association of Conservation Districts. The advisory committee is composed of churchmen of different faiths.

Nineteen-seventy four will be the 19th consecutive year that the Lancaster County Conservation District, along with almost 3,000 similar districts throughout the nation, has sponsored soil stewardship week. The custom of setting aside special "Rogation Days" for this purpose began more than 1,500 years ago in France, when French peasants prayed for help after crop failures had brought widespread hunger.

STANFORD TRIPLE "S"
Sorghum-Sudangrass Hybrid

GREAT WAY TO STEP UP LIVESTOCK FEED PRODUCTION

CHECK THESE ADVANTAGES

All over the country there has been a booming demand for fast-growing, high-yielding annual forage grasses to boost livestock feed production TRIPLE "S" is one crop that is filling this need Here, in summary, are some of the advantages of this exceptional sorghum-sudan-grass hybrid

COMES UP FAST
establishes easily, needs no special pampering

SPEEDY RECOVERY
can be pastured or cut frequently

TREMENDOUS YIELDS
up to 50 percent more forage than some common sudangrass varieties

PALATABLE
your livestock will love it

NUTRITIOUS
high in Protein, TDN value

HIGHER CARRYING CAPACITIES
big yields can mean more cattle per acre

STRONG STALK
stands up well to heavy winds

USES FULL GROWING SEASON
takes advantage of full yield potential when used for silage

HIGH LEAF RATIO
leaves are large plentiful, cover full plant height

Available through Stanford Seed Company Dealers

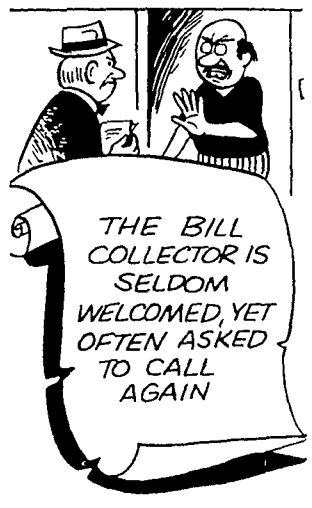
PUNCH LINE OF THE WEEK



# PSU To Hold 7th Annual Ag Alumni Meeting

College of Agriculture graduates of The Pennsylvania State University will hold their seventh annual alumni meeting of the University Park campus May 11. The program opens at 9 a.m. in the Agricultural Administration Building, with registration from 8 a.m. until noon.

"Forests Are More than Trees" will be the 1974 program theme. The morning session in room 301 will feature a slide lecture presentation by the staff of the School of Forest Resources and wildlife management extension. Dr. W. W. Ward, Director of the School of Forest Resources, will be in charge.

Ag. Alumni President Paul S. Harner of State College, class of 1939, will conduct the annual business meeting at 9 a.m. May 11. A morning program for wives will be held in the Agricultural Administration Building.

Banquet speaker will be Dr. George E. Brandow, professor of agricultural economics, who was one of 11 Penn State scientists and educators visiting China in February. Dr. Brandow's observations of China will be presented in an illustrated slide talk. The banquet will start at 7 p.m.

The banquet will feature alumni awards to outstanding College of Agriculture students in four year and two year programs. Group singing will be led by A. Brooks Corl of Pine Grove Mills with Kenneth W. Hylbert of State College at the piano.

Returning alumni will enjoy a full day of activities, including the annual Blue-White football game in Beaver Stadium. A chicken barbecue will precede the game.

# Growing Degrees, Rainfall

A report from Penn State of weekly crop and weather round-ups with a report on weather conditions for the week ending April 29.

In Lancaster, the average temperature for the week was 56 degrees, one degree more than the normal average for the time of year.

Growing degree days for crops that start at 40 degrees totaled 389 degree days or 90 more than the normal average. For crops starting at 50 degrees growing degree days totaled 142 which is 77 more than average.

Rainfall for the week was very slight. Rainfall measured from April 1 was 4.86 inches, 1.38 inches more than the normal average.

# FARM TRENDS

(Continued from Page 1)

### They Kill Cows, Don't They?

NFO members, protesting against the government mandated Class 2 milk price, are reportedly set to slaughter 50,000 cows with calf over the next few weeks in order to reduce the amount of surplus milk going to market The move is termed a "symbolic" gesture, even by NFO members, and the slaughter of only pregnant cows is supposedly meant to heighten the symbolism. A. F. Moyer Co, a Souderton, Pa. slaughter house, killed 125 NFO cows this week.

### Orval Bass Replacement Announced

Warren Archibald, presently working in Kittanning, Pa., will become Lancaster County's new district conservationist as of May 20, it was announced Wednesday night at the Lancaster County Conservation District monthly meeting. Archibald replaces Orval Bass, who was transferred to a similar post in Missouri. Area conservationist James Olsen, who made the announcement, said the county will also get a new conservation technician, Larry Zuschlag, as of June 10.

### Small Rail Groups Seen Needed

In a message this week to businesses and communities along railroad branch lines, Donald W. Parke, executive vice-president of PennAg Industries Association, urged them to form shipper's organizations to help preserve their rail service

"We suggest this for all Pennsylvania businesses and communities, even though their branch lines have not been threatened with loss of service under the Secretary of Transportation's first proposal for restructuring Northeast railroads", he said. "The only way to respond to proposed changes is to have data collected and ready to use A shipper's organization can collect such data and be the spokesman for the branch line. We are not suggesting high-powered, monied groups, but an informal organization to get information together now, to be ready when needed. We have no idea what the next version will be like, but chances are it will be different. We do know the reaction time to that proposal will be 60 days."

The state-wide organization's Executive said that sweeping changes are planned to revamp the rail system One version has already been published. PennAg believes that unless the U.S. Railway Association completely changes the first version, it will cause economic havoc to rural communities in the Northeast and Midwest

"PennAg is not interested in preserving rail service where none is needed", Parke concluded, "but neither does it want to see service denied because of inaction, complacency or defeatism. Date and information is the most effective response."

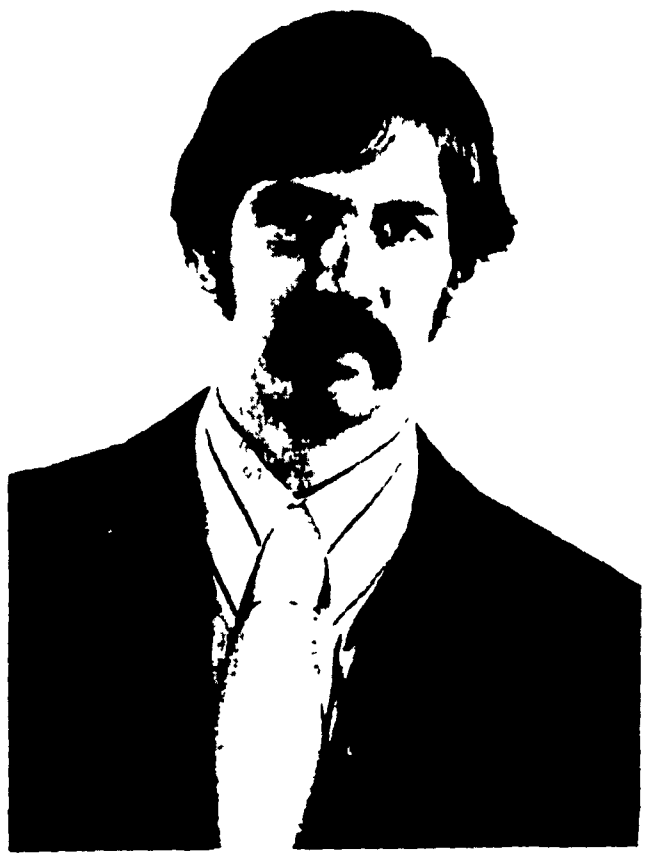
# Twin Valley FFA Wins Berks County Parliamentary Procedure

On April 18, 1974 the annual Berks County FFA Parliamentary Procedure Contest was held at Twin Valley High School. Three parliamentary procedure teams competed to represent Berks County in the Area contest. Conrad Weiser, Governor Mifflin, and Twin Valley FFA Chapters were represented.

Judges for the contest were Charles Akley, vocational agriculture teacher at Ephrata High School; Neil Burtner, vocational agriculture teacher at Owen J. Roberts High School; and Peter Boyer, former agriculture teacher at Governor Mifflin and now of Reading Bone Fertilizer.

Winners of this contest were Twin Valley, first place; Conrad Weiser, second, and Governor Mifflin, third. Members of the winning team were: Terry Murray, president; Robert Stoltzfus, vice-president; Ronald Smoker, secretary; Geoffrey Fultz, treasurer; Lloyd Summers, reporter; David Hammens, sentinel; Melvin Houck, chaplain; and Harold Steve, student advisor.

The parliamentary procedure contest is to test a team's ability to properly conduct a meeting according to the established rules as collected in Robert's Rules of Order. Teams are allowed twenty minutes to conduct opening and closing ceremonies, and handle at least six parliamentary abilities. The teams are given two items of buisness immediately before their demonstration. Quizzers from the other teams are allowed to participate in the teams demonstration to bring up items of business, and ask questions.



C. Thomas Risser

# *Pennfield Adds Lab Director*

Pennfield Corportion has expanded its staff and services with the addition of C. Thomas Risser as laboratory director. Risser will set up a feed quality control laboratory at the Lancaster plant and coordinate laboratory services with the corporation's Technical Services Division. The announcement of the expansion was made by Dr. Richard G. Peacock, director of Technical Services, to whom Risser will report.

Included in the new lab program will be forage analysis, a rather exclusive customer service. This service is linked to Pennfield's Computerized Total Ration (CTR) Program which determines the nutrient make-up and quality of forages used on a farm. The information is fed into computers and the final result is the correct selection of a balanced herd ration.

Before joining Pennfield, Risser was a laboratory analyst at J. W. Eshelman and Sons. The Lititz Native is a graduate of Warwick High School where he was an FFA member and received the Outstanding Senior FFA Student Award in 1968.

Risser and his wife, the former Constance Breitigan of Lititz, and their two children reside on Princess Ann Drive in Lancaster.

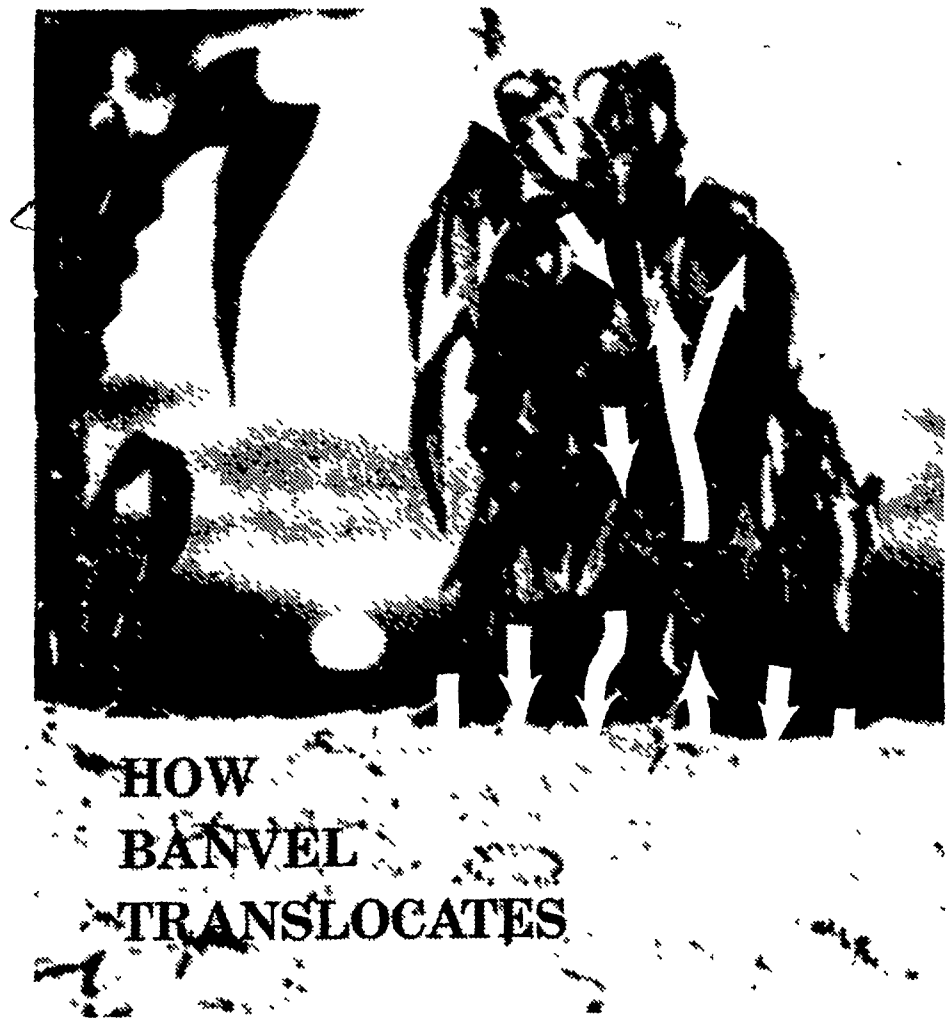
## POST-EMERGENCE APPLICATION IN FIELD CORN GETS TO THE ROOT OF YOUR TOUGH BROADLEAF WEED PROBLEM



Your corn crop is well along. But tough, deep-rooted weeds threaten to take over. The earlier you spray Banvel, the better, preferably before hot, humid weather.

Even though you spray over the tops of corn, normally no brittleness develops. If you see velvetleaf or pigweed, a lower rate of Banvel mixed with 2,4-D will give most effective control.

Banvel works! For one simple reason. Banvel translocates. Absorbed by leaves, stems, roots, Banvel moves with plant fluids from leaf tip to root tip. Destroys as it goes. So, no regrowth.

In permanent pasture, Banvel gives you easy control of more than 40 of the most common weeds, including wild garlic, weed brush and weed trees.

Cost of Banvel? Up to $1.90 per acre broadcast in corn. Ask your dealer or custom sprayer for full information.

# Wear a Poppy-- Help a Vet!

May has been designated as American Legion - American Legion Auxiliary Poppy Month, when the Poppy Program will once again benefit Pennsylvania veterans, their dependents and widows.

The poppy has been a memorial to the war dead for the past 54 years American Legion poppies in the state are manufactured by hospitalized veterans of all wars in VA and service hospitals throughout the Commonwealth, and provide them not only with a therapeutic activity during their hospitalization but also with pocket money Nearly one million poppies are assembled in Pennsylvania hospitals each year, for which the disabled veterans receive one penny per poppy or a total of nearly $10,000 a year.

The patients also receive a "bonus" each year from the Poppy Program when, at Christmas time, the Legion State Commander distributes thousands of dollars worth of televisions, radios, stereos and other recreational equipment to hospitals.

The Poppy Program is a worthwhile one, deserving of support from all persons in the Commonwealth

# National Goodwill Week

A handicapped body does not automatically signify a handicapped mind or lack of will to work Yet for many years, most people with physical disabilities were labeled misfits and pushed from the public eye Fortunately, such a tragic waste of human potential is being corrected, with Goodwill Industries in the forefront of those helping the disadvantaged to achieve productive, self-supporting citizenship.

National Goodwill Week will be commemorated May 5-11 this year and focuses national attention upon the large, highly-successful network of Goodwill job training workshops and rehabilitation programs across the country Our donations of repairable clothing, appliances and furniture mean that the handicapped can learn not only valuable job skills while rejuvenating such articles, but also earn money from their sale National Goodwill Week is an excellent time to show that we care

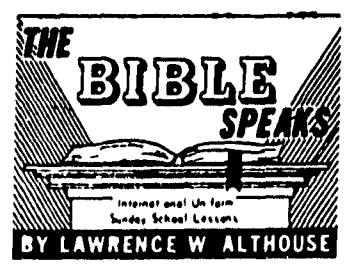
## Three's company ... four's a crowd?

# "Grassroots Opinion"

BLOOMER, WISC., ADVANCE. "The business manager of a large factory collected 25 cents from each of the 2,000 employees to purchase a gift for the big boss who was getting married With this $500 he purchased 2,000 packages of Raleigh cigarettes -- removed the coupons and traded them for a silver serving set for a gift for the boss. Then he gave every employee a package of Raleigh cigarettes for the two-bits he donated, thus no one was out a red cent When the big boss learned of this satisfactory deal, he wanted to compliment the business manager but was told he was on a fishing trip -- trying out the fishing gear he had received for the trading stamps he got when he purchased the cigarettes"

xxx

JOHNSONBURG, PA, PRESS. "The lowly copper penny, the last United States coin with any intrinsic value, is apparently about to go Because of inflation and the demand for copper, the value of the metal is now worth more than the penny. During World War II, pennies were made of zinc-coated steel, but these were all called in and destroyed So it is planned that next year poor old Abe Lincoln, E Pluribus Unum and all, will appear in aluminum and there he will remain until aluminum, too, becomes more valuable than the penny Then the Great White Father in Washington will probably resort to wampum"



## THE OPEN MIND

**Lesson for May 5, 1974**

**Background Scripture:** Acts 17.
**Devotional Reading:** Acts 17:22-34.

Someone has said that when some people insist that they are "standing on their principles," what they are really doing is sitting on the lid of a closed mind."

One of the primary reasons for the divisions among men of religious faith and the parochial spirit is our unwillingness to listen to each other with open minds. Often I have found that people in an argument may be much closer in their thinking than they realize. The reason they do not understand this is that are too busy arguing to really listen to one another.

**Examining the scriptures**

Many of the places that the Apostle Paul visited on his missionary tours greeted him with closed minds and a hostile reception. One exception was Beroea. Here, the writer of Acts tells us, they "received the word with all eagerness, examining the scriptures daily to see if these things were so"(17:11).

There was an "eagerness," an openness about the people in Beroea. They were willing to listen to Paul and his group. All too often, people reject what others have to say without ever considering what it is that is being said. They begin with the assumption that they will disagree and nothing will deter them from fulfilling that expection. As Herbert Spencer once noted:

There is a principle which is a bar against all information, which is proof against all arguments and which cannot fail to keep a man in everlasting ignorance. That principle is comtempt prior to investigation.

Often I find Christians using the scriptures, not "to see if these things are so," but to prove that someone is wrong. Thus, they take to the scriptures a mind that is already prejudiced.

**"You are very religious"**

Not only did the Beroeans greet Paul with open minds, but we also find that Paul himself could be open-minded when he spoke with men of different religious persuasions. In Athens, for example, he did not begin his preaching by telling the Athenians that theirs was a "wrong" or "false" religion. Rather, he began by acknowledging that they too were seeking God: "Men of Athens, I perceive that in every way you are very religious" (17:22).

This was not only a skillful strategy on Paul's part, but a recognition that these men were sincere in their religious quest. His technique was to try to show them that the God they were seeking to know was the same God he found revealed so fully in the person of Jesus Christ.

Acts 17 can be very instructive for us today, for, if as followers of Jesus Christ we want to be received with open minds, so we must also approach others with that same willingness to listen and consider.

**To Be Careful With Left-Over Seeds**

Many garden and farm seeds will be left over from the spring planting. Some of these can be used later in the season for second plantings. However, some will not be needed until next spring. Several things should be kept in mind. First, most seeds may be held until next year if kept in a dry place away from rodents and away from weed killers. Secondly, these grain seeds are not suitable for human or livestock consumption and should not be used as feed or food. Most seeds are treated with one or more chemicals to control insects and diseases and may be toxic. Proper care of these seeds is important at this time.

**To Recognize Stage Of Maturity**

The harvest season is approaching rapidly and most forage crops are developing ahead of schedule; already the winter rye crop has been made into silage on some farms. The grass-legume crops are growing rapidly. The extremely hot weather of the past week pushed the crops rapidly. Space does not permit all details but producers are urged to learn the best time to cut their forage to get maximum feed nutrients. Early cut hay, either for silage or for hay, is leafier, higher in protein, vitamins, and minerals, and lower in fiber than later or more mature hay crops. Alfalfa and clover are best at full bud to early bloom stage, and grasses should be cut just as the heads are emerging from the boot of the plant. Don't let forage crops mature and be the loser.

**To Practice Good Sanitation**

Insects such as flies and mosquitos will soon be bothering most of us. The place to start this control program is to give all buildings and surroundings a good house-cleaning and eliminate all possible fly and mosquito breeding places. Stagnant water in holes or empty containers are mosquito maternity quarters. Dirty barns and barnyards are places for flies to reproduce. The use of insect killers along with clean premises and strict sanitation should keep the insects under control for the summer. Residual sprays for farm buildings are available but suggest that different ones be used from year to year to prevent a buildup of fly resistance.

**To Respect Your Neighbor.**

This is always a good suggestion but not followed at all times. I'm referring to the use of spray materials in the community and especially weed killers. With the favorable growing conditions weeds will become a problem immediately. Herbicides have been widely accepted to kill trees and plants. All spray operators are urged to be very careful with the chemical weed killers. Damage may be done from the wind blowing spray particles (drift) or from the fumes of the weed killer in extremely hot weather. Read the label and following the instructions completely.

# Farm Calendar

**Saturday, May 4**

7:30 p.m. - Centennial Celebration of Fulton Grange No. 66, Grange Hall, Oakryn.

Show Day for the 49th annual Dairy Exposition, Penn State.

**Monday, May 6**

8:00 p.m. - Lancaster County Poultry Assoc. Board meeting, Farm and Home Center.

**Wednesday, May 8**

7:30 - 11:00 p.m. - Forest Fire Training Session for Lancaster County Firemen, Lancaster County Fire School, Pequea Rd., South of Lampeter

**Thursday, May 9**

8:00 p.m. - Special public forum on farm land assessment, Rm. 12, Municipal Bldg., Lebanon.

FFA Leadership Training Conference.

7:00 p.m. - Pa. Egg Marketing Assoc. meeting, Colonial Motor Lodge, Denver, Pa.

**Saturday, May 11**

10:00 a.m. - 10:00 p.m. - Maryland Sheep and Wool Crafts Festival, Carroll County Agricultural Center.

## Consumers' Corner

**Maintaining A New House**

Knowing how to take care of and maintain a new house is about as important as knowing how to take care of and maintain a new baby

In some areas of the country, new homeowners can enroll in classes on Home Maintenance and Care at local colleges or high schools

One homemaker who took such a course in Home Care and Maintenance says she learned how to take care of her new floors and ceramic tile She also discovered a moisture and mildew problem inside her house and found out how to curb it before it got out of hand

The same woman found she needed to put plastic underneath her house and haul in some soil next to one corner of the house for better drainage

If that wasn't enough, the same homeowner found that the insulation underneath her house had been put in backwards and needed to be turned over

That's one woman who has become a very enlightened lady concerning care and maintenance of a new home, thanks to a course in Home Care and Maintenance

# Cooperative Movement Key To Family Farm Survival

The cooperative movement must be encouraged and not threatened by undue antitrust restraints in order to encourage the survival of the family farm and keep farm marketing open, Under Secretary of Agriculture J. Phil Campbell said in Madison, Wisconsin recently.

Addressing the Symposium on Cooperatives and the Law, Mr. Campbell asserted that "we are moving out of an era in which government will stand as a backstop for continuous overproduction and moving into an era in which production must be market oriented.

"But if there is to be an open market, we must insure an organizational base to keep it open. In short, we must encourage the cooperative movement if the family farm is to survive and we are to keep food and fiber in an open market.

"There is much concern for continuation in America of the family farm, a tough competitor which lives upon its own labor and its own management. Yet, it is ironic that while concern for the family farm remains high, there is little concern expressed for the organizational economic climate which offers it the best opportunity to survive – a favorable climate for cooperatives."

The question of antitrust should not be silenced throughout the food industry, however, Mr. Campbell said. "Rather," he said, "let it be leveled at the points where it is needed most – at those sectors of the economy that sell to and buy from the farmer which are, in fact, already highly concentrated."

Eighty-five percent of a farmer's production inputs are purchased – mostly from highly concentrated industries, Mr. Campbell said. "But having acquired the tools of production," he continued, "the farmer must then risk the vagaries of the weather, disease and insects, as well as a highly variable price structure for his production – and he is the one who must bear the risk of betting this year's production costs against next year's demands.

"While there may have been a time early in American history when independent family farmers could prosper while supplying a free and open market, such a prosperity has been sporadic at best and a free and open farm market has not been available here for a long, long time.

"The history of cooperatives and other farmer organizations which sprang up in the 19th and early 20th Centuries is that of farmers banding together to free markets from the iron grip of buyers. The pressure to obtain or retain such control is constant among the buyers. Markets are either closed or constantly threatened by closure. Many commodities today, notably broilers, no longer operate in a free and open market."

The Under Secretary warned that there are dangers in cooperatives that farmers must guard against.

"Farmers must always beware of being victimized by poor or greedy management in cooperatives ... as stockholders in a corporation and as members of a labor union sometimes are victimized.

"The experiences of the dairy farmers, who have lost some political power, should serve as a warning. Elected officials listen to them now more because of their vote than because of their money because of the wide publicity given to money contributions made to members of both parties for political campaigns."

An alert membership is important, Mr. Campbell said. "Farmers who do not attend the annual meetings of their cooperatives have no right to complain about their management," he observed.

In addition to good management, Mr. Campbell said, cooperatives must have expert legal advice to assure that they will comply with all Federal and State laws, particularly in the area of antitrust.

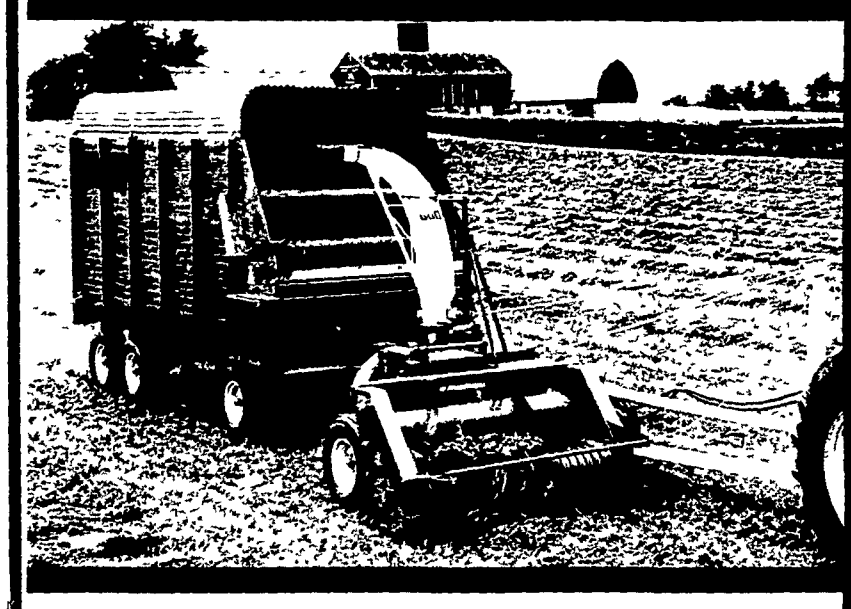
### Cooked Tongue

Cooked tongue is an "ace" in the refrigerator for meat platters or for combining with salads for a cold meal It's easy to cook and chill a fresh or smoked beef tongue, which is convenient for future use Just cover with water, cover the pot tightly and simmer until tender, 2½ to 3½ hours Plunge tongue in cold water remove skin and chill Slice as desired.

BEACON

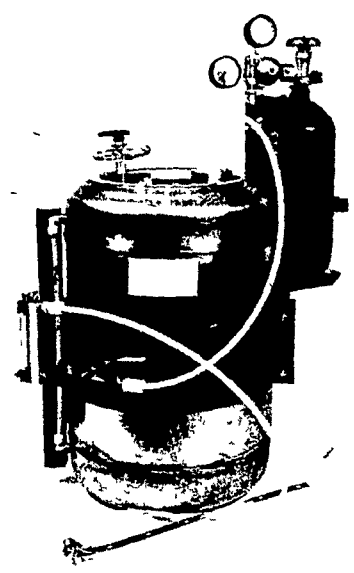
# Hay Pre-Serv

## Harvest more hay per acre...more digestible nutrients per ton.



Hay Pre-Serv helps retain the nutrition, palatability and just-cut coloration of hay. It increases the digestible nutrients. You can safely store hay up to 25 percent moisture without worry. Hay Pre-Serv costs little to use, and achieves the results you've wanted.

## Stainless Steel Liquid Applicator.



Beacon's S S Liquid Applicator is pressure operated and accurately dispenses Beacon Hay Pre-Serv in the form of a spray The applicator is easily mounted on all types of haying equipment Unit can also be used to treat silage With minor modification, unit may be used for treating high moisture (25%) grain.

**ADVANTAGES**

- Stainless steel reservoir
- Easily mounted or installed
- Powered by compressed $CO_2$ gas or 12 volt air compressor
- Built-in safety features
- Maintenance at a minimum
- Holds 120 lbs. of chemicals
- One year warranty on reservoir
- One year warranty on compressor and balance of applicator
- Liquid level gauge
- All parts chemically resistant
- One tank of $CO_2$ dispenses 300 to 500 lbs. of chemical under average conditions
- Pressure regulator can be permanently set
- Pressure gauge indicates amount of $CO_2$ in pressure bottle
- Flow meter to observe flow of chemical
- Liquid filter
- Nozzle assembly available

### BREAKFAST IS A QUICK-CHANGING MEAL

The foods people eat for lunch and dinner change slowly. Meat, potatoes, bread and salad are long-time favorites, and although meat consumption may go down as prices go up, the general pattern of noon and evening meals is likely to stay the same.

Breakfast is a different story entirely. Here there's innovation. The latest trend is to consider breakfast an important meal, not just an eye-opener. Ham and eggs are not the route the new breakfast eaters are taking though. A wide variety of foods – emphasizing high-protein value – are gaining breakfast popularity.

These are some of the factors behind the breakfast revolution:

1. There's a growing interest in personal efficiency, in "feeling good." And the feel-good value of a protein breakfast, shouted for years by nutritionists, is finally getting through to the public. On a slack-filled stomach, efficiency tends to decline in late morning.

Millions of people who switch from just coffee and doughnuts to a sound morning meal feel an energy boost, and they're telling their friends.

2. At the same time, traditional breakfast foods are either under attack, or are going stale in the public's eye. Until the new natural cereals came along, there was no growth in adult demand for corn flakes and puffed rice. Cereal makers put much of their effort into slanting those products to children's tastes.

3. Breakfast is an ideal meal for eating exactly what you want – what turns you on. Preparing your own breakfast is easy, and often necessary. And as long as you're doing that, why not make exactly what you want. Which is exactly what millions of people are doing.

Natural foods are a big part of the new breakfast picture. Granola helped start that trend, because it tastes good and still provides the protein and solid bulk that are musts for a stick-to-the-ribs breakfast. But granola is just a starting place for further experimentation.

Home-made yogurt is gaining in popularity as a breakfast food. It has the advantage of low cost, and many think it has a

smoother, more natural taste than commercial yogurt. Yogurt is also easy to use as a base for constantly-varying breakfast menus. An almost limitless variety of fruit and health foods like wheat germ and sunflower seeds can be added to yogurt, with good taste results.

Fiber-rich foods like bran, oatmeal, and whole grains of various kinds are on the upswing. Recent studies have shown that high-fiber diets minimize intestinal problems, and possibly are a preventative of bowel cancer, a growing menace. Breakfast is the ideal time to make sure that you get a regular ration of bran, or other fiber food.

A blender is the key to almost limitless breakfast innovations. Using fruit or milk as a base, all kinds of nutritious foods and even food supplements can be added to make delightful-tasting superfoods.

Bud Decon, an aging athlete who holds 11 world records for the 60-69 age group, claims that diet is an important part of his continued success. Written about recently in "Sports Illustrated," he told of a breakfast drink he makes, blending three tablespoons of brewer's yeast, two of a vitamin mixture, plus one tablespoon each of soy flour, sesame meal, sunflower meal, wheat-and-rice bran, rice polish, brown rice, maple syrup, millet and powdered protein.

Does that sound odd? Well maybe it tastes a little different than butter toast, but can you run a mile in 5 minutes and 41 seconds – at the age of 62?

A good, drinkable breakfast that can be made in a blender combines these ingredients:

1 banana
2 very heaping tablespoons of non-instant milk powder
2 cups of cold water
1 heaping tablespoon of brewer's yeast
1 tablespoon unsulphured molasses
1 tablespoon honey

Peel and break the banana into chunks. Add the remaining ingredients and blend at medium speed until smooth. The recipe yields two large glasses.

Here are two other recipes for breakfast variations featuring natural foods:

HIGH PROTEIN CEREAL

In a nut grinder, grind the following seeds in the proportions suggested below:

4 parts sunflower seeds
2 parks pumpkin seeds
2 parts roasted soybeans
2 parts unblanched almonds
1 part carob powder

Mix thoroughly and store in refrigerator. Serve with fruit juice, milk or fruit: bananas, berries, prunes, etc.

NO-SUGAR CEREAL

The night before, put the following to soak in cold water:

½ cup chopped sunflower seeds
½ cup large rolled oats
½ cup millet
½ cup buckwheat groats
1 cup unsprayed, unsulphured raisins or dried prunes

In the morning, put the cereal (adding more water if needed) on a moderate heat and bring to a boil. Serve with milk. It needs no sweetener; the fruit takes care of that. Yield: 4 servings.

xxx

Why limit good-for-you eating to just breakfast? The 77-page "Better Living Cookbook" shows you how to pack flavor and nutrition into every meal. For a copy, send fifty cents to Robert Rodale, Organic Living, in care of this newspaper. Be sure to request the booklet by name, and please allow three or four weeks for delivery.

# New Family Health Center Now Open

The Southern Lancaster County Family Health Center of the Lancaster General Hospital is now treating patients at its new facilities located at 317 South Chestnut Street, Quarryville. Since its inception in October, 1971, the Center had been located at 1 East Fourth Street in the building which formerly served as the consistory of St. Paul's United Church of Christ. The move to larger quarters has been necessitated by the increase in patients and need for additional treatment space.

The purpose of the Center is to provide comprehensive health care to the families in the Solanco area, placing emphasis on preventative medicine and total health care for patients and their families. Under the direction of Herbert L. Tindall, M.D. and Nikitas J. Zervanos, M.D., Associate Director and Director, respectively, of the Family and Community Medicine Program, it is staffed by physicians in the Family Practice Residency Program of the Hospital.

By the end of February, 1974, 6,744 patients had made 26,048 visits to the Center. 2,087 families are registered with the Center for their total medical care.

The new facilities double the amount of rooms available for treating patients. Whereas the former facilities provided six clinical rooms, there are ten permanent examing and treatment rooms in the new center with two additional rooms available for this purpose during peak hours. An additional room has been added for physiotheraphy, electrocardiograms, and other clinical activities. Another room has been designated for counseling and family therapy.

Another innovative feature of the new Center is the patient education room. Here patients are counseled on the nature of their health problem and its proper treatment. Instructional booklets and other patient education material will be available there. Also, modern audio visual equipment will be used in this room to instruct patients on certain aspects of health care.

Hours at the Center remain the same, which are by appointment from 10:00 A.M. to 9:00 P.M. on weekdays. At other times, one of the Center's physicians will be available at the Center for emergency consultation or will be on constant radio page in the event that he must leave the Center. The practice is covered 24 hours a day, 365 days a year, with one or more physicians present at the Center 20 hours out of each day, and a doctor on call at all times.

The telephone number for the Center remains the same, 786-7383.

# Four Retire At New Holland

Four local men are retiring from work at Sperry New Holland Division of Sperry Rand on May 1 according to an announcement made today.

John H. Kissinger, 150 W. Roseville Rd., Lancaster, will retire as a process engineer in the company's manufacturing division after 27 years with the company.

Raymond C. Kissinger, 535 Westfield Dr., New Holland, will also retire on May 1 as a receiving depot group leader in the Sperry New Holland manufacturing division.

Melvin E. Pfautz, 306 North Eighth St., Denver, will retire as a tool inspector.

Clarence M. Miller, 25 School Drive, Leola, will retire from his position as service parts order editor in the Sperry New Holland service department.

# Weaver Promotes Three

Donald C. Long, 115 N. Hill St., Terre Hill, Donald L. Brubaker, 2168 Main St., Rothsville, and Clyde E. Espigh, 104 Vine St., Terre Hill, have been promoted as part of a Financial Division organizational change at Victor F. Weaver, Inc., New Holland, Pa. according to Delbert Seitz, Corporate Treasurer.

Long, formerly cost accounting supervisor has been promoted to the newly created position of financial analyst.

A graduate of Elizabethtown College with a B.S. degree in Accounting, Long joined Weaver in 1970 as an accounting trainee and was later named cost accounting supervisor. In his new position as financial analyst, he will be responsible for the preparation, compilation and review of corporate operating budgets, plus analyzing cost and return on investment studies.

Brubaker, who recently held the position of accounts payable and payroll supervisor has been named cost accounting supervisor.

Brubaker joined Weaver in 1969 as a computer operator, and in 1971 was named accounts payable and payroll supervisor.

In his new responsibilities Brubaker will supervise and maintain the standard cost accounting system and prepare corporate cost information and studies.

Espigh, who has been a management trainee since joining Weaver in 1973, has been promoted to accounts payable and payroll supervisor with the responsibility of supervising the processing and payment of Weaver accounts and the processing of related records. He is a graduate of Eastern Mennonite College, where he received the B. A. degree in Business Administration.

### Seams

Welt and flat felled seams eliminate bulk, prevent raveling, and add interesting detail to seams. Contrasting thread (white on navy, black or red) gives a sporty, well made look. Be creative!!

Pleasure Stake — Darlene McClain, Lancaster; Galen Ehrhart, Dallastown.

Trail — Roberta Stein, Mountville; Robin Tshody, Manheim.

## Elco 4-H

Election of officers and program planning was the main order of business at a meeting of the Elco Town and Country 4-H Club.

Mr. and Mrs. Roy F. Miller of Myerstown RD3 hosted the meeting. Twenty members and eight adult leaders, Mr. and Mrs. Harold Weaver, Earl Weaver, Mr. and Mrs. Roy F. Miller, Ruth Miller, Margaret Risser and Howard C. Miller attended.

Results of the election of officers is as follows: Ernest Wyatt Risser, president; Carl Weaver, vice-presidet; Rebecca Miller, secretary; Patti Miller, assistant secretary; Betty Kegerris, treasurer; Edna Stine, news reporter; Loretta Weaver, social leader; Sharon Bowman, assistant social leader.

Program planning committee report was given by Ruth Miller.

Club activities for the year of 1974 were discussed. A committee of the officers and leaders will meet in the near future to plan the club year.

Enrollment forms and project books were handed out. Insurance forms were also handed out and must be returned by May 1.

Ernest Wyatt Risser, president, conducted the meeting. Next meeting will be held on May 7 at the home of Sonja and Sandra Hayes, 1924 Leinbaugh Avenue.

## New Holland 4-H Baby Beef

The fifth meeting of the New Holland 4-H Baby Beef club was held at the home of Gordon and Audrey Hoover on April 5 at 7:30 p.m.

The members decided to go to Longwood Gardens and Lanapead Park for a trip.

After the meeting, Linford Weaver showed slides of his 2 years in Belize while in the voluntary service. Then our hostess, Mrs. Raymond Hoover, served refreshments.

How you can get a dozen more eggs per hen for less than 3¢

The AUREOMYCIN Week-A-Month Layer Program

The economic advantages of feeding AUREOMYCIN to commercial layers have been well documented.

Now, with today's cost of feed and the price of eggs, new interest has been shown for this accepted and profitable practice.

Whether you sell eggs for 40 ot 60 cents a dozen, this Cyanamid program can increase your income . . . substantially.

The Week-A-Month Layer Program involves feeding 100 grams of AUREOMYCIN chlortetracycline per ton for one week at housing and for one week each month for as long as birds are in production.

Field trials show that for an investment of less than 3 cents in AUREOMYCIN per layer you can expect an extra dozen eggs per bird, or an extra return of $400-600 per 1,000 birds — with eggs at 40-60 cents per dozen.

The Week-A-Month feeding program with AUREOMYCIN is equally effective for broiler breeders.

Trial results show that an investment of less than 3 cents in AUREOMYCIN per breeding hen can produce 6 extra chicks per bird, or a total of approximately $450 extra return from every 1,000 breeders a year — figuring the cost of chicks at 7.5 cents.

Whether you're producing table eggs or broiler chicks, for extra profit put your next flock on the Week-A-Month Layer Program with AUREOMYCIN.

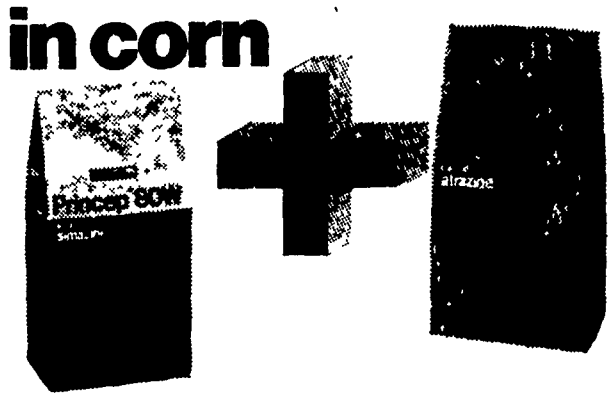
Best answer yet to fall panicum and crabgrass in corn



Add Princep® herbicide to your AAtrex® spray. Mix in a one-to-one ratio, and apply at the same rate as AAtrex alone. Controls fall panicum, crabgrass, and other fall grasses. Gets the early weeds, too. And, it costs less than other combinations.

See us. We've got the details.

# Happy Variety 4-H Club

Installation of officers was held recently at a meeting of the Happy Variety 4-H Club in the Lebanon County Municipal Building.

Thirty-two members, two guests, Mrs. Preston Hostetter and son, Preston Jr., and four adult leaders, Mrs. Luke Hostetter, Mrs. Leon Bell, Preston Hostetter, and Mrs. Melvin Noll attended.

The new officers for 1974 are: Maxine Noll, president; Antonio Klick, vice president; Victoria Gonzalez, sectretary; Feffery Arnold, treasurer; Michelle Noll and Joseph Hoke, game leaders; Joe Arnold and Patricia Roof, song leaders, and William Zimmerman, news reporter.

Diane Roof reported on the Cancer Drive, and thanked the members who helped. Workers were Kathryn Pence, Elizabeth Arnold, Diane Roof, Maxine Noll, Joseph Arnold, and Gail Kleinfelter. A total of $75 was collected. Joseph Arnold gave a final report on the cookie sale, and thanked everyone for their cooperation.

A bicycle rodeo will be held for members of the club on June 26 at the 4-H Fair Grounds. Kathryn Pence announced that prizes would be awarded on bicycle skills.

It was also announced by Diane Roof that on July 24 there will be a demonstration contest for all members at the Area Fair Grounds, and that there will be prizes for the top three demonstrators.

Friendship was the title of the talk given by Diane Roof. Joseph Arnold, president, conducted the meeting. The next meeting is planned for May 15 at the 4-H fair grounds.

# Thomasville 4-H Club

The Thomasville 4-H Club met April 23, 1974 at the 4-H Center. Pledges were led by Teresa Roser and Sandy Hoke. Members have been active in a roadside clean-up campaign along the roadways near their homes.

The club will participate in a group in observing Rural Life Sunday on May 19 at the West York Church of the Brethren. Some of the 4-H'ers will help with the service.

A donation is being made to the 4-H Center by the club. Demonstrations were given by Scott Rauhauser, Bonnie Wire, and Jonathan Myers. Films on resuscitation and first aid from the Red Cross were shown by Jeff Roth.

7:30 p.m. - E-Town Pig and Rabbit Club meeting, West Donegal Twp. Polling Building.

7:00 p.m. - Stoverstown 4-H club, 4-H center.

7:30 p.m. - Airville 4-H Milk and Money Club, Paul King's, RD2, Delta.

**Friday, May 10**

7:30 p.m. - Wellsville 4-H Club, Rossville Lions Hall.

# New 4-H Club

Interested in having fun, making new friends, all while learning about new things? Then come to the organizational meeting for the new 4-H club in Jennersville. The meeting will be held 7:30 p.m. on Monday, May 6 at the Church of the Brethren, RD1, Jennersville. All interested youth, parents and adults should plan to attend.

4-H offers a variety of projects which appeal to all youth. A leader is available for projects such as babysitting, home decorating, foods and outdoor cookery. Some other projects that could be offered if adults are willing to help are, gardening, pet care, entomology, knitting, etc.

All boys and girls between the ages of 8 to 19 are eligible to join 4-H. Also any adult interested in sharing their skills with youth may serve as project advisors. For further information contact Mrs. Betty Nelson at 869-3140.

Preserve Maximum Nutrient Content and Palatability
by using

"Silo-King" Silage Preservative:

DON'T WASTE A THING, YOUR CROPS ARE TOO VALUABLE

— Hay or haylage value ranges from $20.00 to $80.00 per ton in feeding value: on a 10 percent dry matter basis.
— Due to the ever increasing cost of feeding and maintaining livestock, your future may depend on your handling of roughage in the most profitable manner.
— To prevent weather loss in making haylage, mow in the morning after the dew is off and chop that afternoon on a good drying day:
— And to help prevent heating, vitamin loss, energy loss, protein loss, and silo-stink, apply "SILO-KING" silage preservative.
— Another bonus from using "SILO-KING" is greater silo capacity. This is due to the higher moisture content that's possible to maintain by using "SILO-KING"

For oustanding results, proven again and again in 23 states and Canada.
For higher feeding value and greater silo capacity.

Five delegates from Pa. who attended the 44th annual National 4-H conference in Washington, D.C. are (left to right) Gordon Johnson, RD1, Gettysburg; Stanley Helman, RD2, Chambersburg; Linda Hartle, RD1, Bellefonte; Elizabeth Hutchison, RD2, West Grove; and Lawrence Rappoldt, RD1, Glen Rock.

# 4-H'ers at National Conference

Beth Hutchison a 4-Her from West Grove was one of 5 4-Hers who represented Pennsylvania at the National 4-H Conference. Nearly 250 4-H members from every state, the District of Columbia, the Virgin Islands, Puerto Rico, and each province of Canada represented their home territories at the 44th National 4-H Conference. The Conference began April 20 and continued through April 25 at the National 4-H Center in Washington, D.C.

Some of the objectives of the conference included identifying some of the major issues of concern to youth today, discovering action being taken by federal government agencies and Congress and how this affects the 4-H scene today, and exchanging ideas with other members at the conference to help strengthen 4-H programs back home.

During the conference, which officially opened Saturday with a general session at the National 4-H Center, the young men and women had an opportunity to communicate face to face with officials of more than 20 federal agencies as well as with their Senators and Congressmen. Time was also devoted to workshops in interviewing and investigative reporting techniques and also on communication. These workshops involved the resources of representatives from the local media.

The visits to the federal agencies took place on Monday, with small groups interviewing agency officials. On Tuesday 4-Hers visited with their State Senators and Representatives on Capital Hill.

After meeting with the federal officials, sessions at the 4-H Center were largely devoted to the theme of the conference - "4-H Gets It All Together". Working as teams, the young people prepared reports on the ways in which both issues and the investigative process can be applied to both local and state 4-H programs. This report session was held after a special luncheon honoring outstanding volunteer 4-H leaders, and 4-H members selected to be members of the 4-H Report to the Nation Team for 1974. Posters submitted from every state were on display during the week, and the winning poster announced at the closing luncheon.

DA 1230

There's A Difference!

Here's a rugged new breed of silo unloader with a big difference from other machines — a difference that means better performance.

The DA 1230 has double augers but more important they're differential augers. The rear auger is larger than the front auger and the two augers turn at different speeds. The result is up to 30% more wall pressure for smoother performance in all types of silage soft or frozen. Silage flows into the impeller in an even stream — no slugs or pulls of silage that can clog other machines and rob capacity. The differential augers break up compressed silage to give you smoother operation and greater capacity. You get Non Stop Feeding with the new DA 1230 unloader.

# Conservation Contest Winners Announced

A corn growing project and a speech on water pollution were picked for first place prizes on Tuesday evening during the annual Lancaster County Soil and Water Conservation Roundup held at the Farm and Home Center.

Steve Arbaugh took top prize in conservation projects with his demonstration of the growth rates of corn planted in different soil types. He is the 12-year-old son of Mr. and Mrs. Phillip Arbaugh, New Providence RD1, and he's a seventh grader at Quarryville Junior High. The youth is a member of the Southern 4-H Soil and Water Conservation Club.

Kerry Boyd, Ephrata RD1, took top prize in the speaking contest. He is the 15-year-old son of Elmer Boyd and is a sophomore at Ephrata Area High School where he is a member of the Cloister FFA chapter.

Second place in the public speaking event went to Curtis Martin, 14, son of Mr. and Mrs. Samuel W. Martin, Ephrata RD1. A freshman at Ephrata High School, Martin is a member of the Cloister FFA Chapter.

Speaking on fish conservation, Martin told of methods of improving fish populations and major problems associated with maintaining good fishing conditions.

Jeff Gehman, 13, son of Mr. and Mrs. Paul H. Gehman, 126 Bonview Drive, Denver, was reserve champion in the conservation project contest.

A member of the Northern 4-H Soil and Water Conservation Club, Gehman displayed his project on the effects of conservation plowing on water runoff.

Third place in the public speaking contest went to Galen Sweigart Jr., Gordonville RD1, who spoke on "Our Diminishing Forests." He is a freshman at Pequea Valley High School.

In Boyd's winning speech on clean water, he told of various pollutants, the greatest of which is sediment from soil erosion.

Boyd noted that factories and industries have also polluted vast amounts of water and that in recent years great sums of money have been invested in attempts to treat these wastes.

Mine drainage, according to Boyd, is the second greatest threat to clean water as acid drains into streams resulting in losses of aquatic life.

"The problem is not going to be easily solved unless everyone becomes concerned about the quality of our environment and is willing to do his part," said Boyd.

# Red Rose Baby Beef Wins Junior Judging

Four members of the Red Rose 4-H Baby Beef Club joined efforts to make the Lancaster County 4-H Judging Team that won the recent Junior Judging Contest at Penn State University.

The contest included eight classes of livestock (beef cattle, sheep, and hogs) with oral reasons on one class of each species.

Steve Donough of Manheim RD4 was 4th in judging beef cattle, 3rd in swine, and fourth high individual in the contest. Kevin Rohrer, Manheim, RD2, was high man in sheep judging with Kenneth Brubaker, 2418 Harrisburg Pike, Lancaster, placing 5th in judging sheep. The fourth club member on the team was Ronald Kreider, Manheim, RD3, Pa. As individuals in the total contest Kevin Rohrer was 6th and Kenneth Brubaker rated 9th among 44 contestants.

The Lancaster Team was first in judging beef cattle, first in judging sheep, and third in swine judging. In winning the overall contest the Lancaster County team earned a total of 1447 points (possible 1650) followed by York with 1438 points, and Mercer County with 1433 points.

The Lancaster group was supervisied by Beef Club Leader, John R. Zimmerman, Ephrata, RD1, Pa. on their trip to and from the Penn State campus. A total of 11 4-H and FFA judging teams competed.

The next contest for the local judging group will be the State Contest to be held in August at Penn State University. This was the first year for the Junior Spring Judging Contest which was sponsored by the Block and Bridle Animal Science Club at Penn State.

**DO YOU KNOW HOW MUCH MILK YOUR COWS CAN REALLY GIVE?**

A cow is a factory. She eats grass, hay, silage, grain and Wayne Feeds. She makes milk. Each cow-factory has a certain bred-in capacity. When Bossy's assembly line isn't running at full capacity, she isn't making as much money for you as she should. ■ The way to find out if she's really running at full capacity is to put more feed in and see if you get more milk out. FEED HER ACCORDING TO WHAT SHE COULD GIVE TOMORROW, instead of what she gave yesterday. ■ Wayne can show you how to balance these larger feed intakes so that your cows can handle them. You feed the rumen bacteria too, so they can work harder and digest more roughage. ■ See us now for the Wayne Program that will work for you . . . choose from our quality Wayne Feeds . . . Wayne supplements and complete feeds to meet your needs . . . do it today!

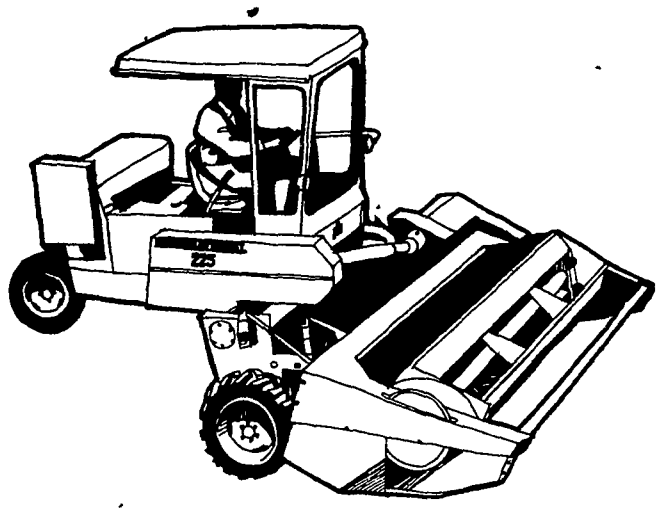
**If hay crops are an important part of your business**



**225 HAY SWATHER**

Lay excellent windrows with the International® 225 Self-Propelled Hay Swather, even if the weather has knocked the crop into a down, tangled mass. Whether it's 10-foot tall sorghum crops or three-foot alfalfa it's handled better with the 225 than other machines.

- Windrow forming shields easily adjust to extra-wide windrows, or full-width swathing without tools.
- Ten-foot wide adjustable tilt platform has exclusive torsion bar float to keep it working at the right level in contoured fields
- Cuts 1,500 strokes per minute.
- Overshot auger design permits machine to work in varying conditions and in a range of crops and helps prevent uprooting of crop.

**Come in and see the 225 . . . it's a real haymaker.**

# LancasterHeritage Antique Show

During the early years of the settlement of Lancaster, silversmithing was a thriving trade.

Shortly after Lancaster was founded in 1730 as the oldest inland town in North America, the village found itself to be an important point on the trade route between England and the Ohio Country. Silversmiths came here to produce silver items as part of that trade.

Some of that silver, much of which was produced for trade with the Indians of colonial America, will be part of a special exhibit to be shown at the Lancaster Heritage Antique Show on May 10, 11 and 12 at the Farm and Home Center in Lancaster.

The show is the third annual Lancaster Heritage Show being conducted for the Benefit of the Lancaster County Farm and Home Foundation. The show is sponsored by the Farm and Home Foundation in cooperation with the Lancaster County Historical Society.

The silver exhibit is part of the Lancaster Historical Society collection.

Silver on display will include the work of such early Lancaster silver masters as William Haverstick, who lived here from 1756 to 1783, David Hall, 1767 to 1814, John Ewing, 1755 to 1799 and John Musser who smithed in Lancaster until his death in 1837.

In addition to the silver display, the three-day-show will feature the sale of some of the finest antiques presented in a show setting in the United States. A group of outstanding dealers coming from Maine, North Carolina, West Virginia and all states in between, including many of the finest Pennsylvania dealers will take part in the event.

Bowl by John Ewing, 1755-1799.

Coffee Pot by Chas. Hall, 1742-1783.

The show is being managed by Peggy Stewart Antique Shows of St. Michaels, Maryland and will feature Pennsylvania folk wood carving and painting and rug hooking demonstrations and a special exhibit of rare Fraktur from the Lancaster Historical Society Collection.

The Lancaster Heritage show and Sale will open on Friday May 10 and run through May 12. Hours of the show are from noon until nine p.m. on Friday and Saturday and noon until six on Sunday. Admission for the show will be $2.00.

The show will be preceded by a special Preview Sale and reception, on Thursday May 9 at 7:00 p.m. Tickets for the Preview Sale are available at $7.50 each from Mrs. John L. Polcyn, 120 Eshleman Road, Lancaster, Pennsylvania.

### Lawn Care

With warmer weather due to arrive at any time, many property owners will be outside getting the garden and lawn in summer-time condition. A good raking might be one place to start before any lime or fertilizer is applied; this will remove excess trash and old grass from last year. Lime should be applied when needed according to a complete soil test, followed by moderate fertilizer applications. In many cases the weed killers can be applied with the fertilizer thus saving a separate spraying operation. Mowing can be started when grass growth gives anything to mow; some areas of rank growth may need mowing before the entire area.

The "Systems Approach" OF Big Dutchman® Lets You PUT IT ALL TOGETHER

Today's profit-minded poultry and livestock producers must think in terms of an automatic system.

Big Dutchman pioneered the system concept for one reason: it is the most profitable and reduces costs for you.

"System thinking" can help you plan your way around problems before you begin building, or it can help you automate away problems in your present buildings.

Hershey Equipment Co. is geared to provide all components of the system, which assures that the pieces fit together in the most profitable package reducing costs dramatically.

Some of Our Systems Include

HOG SYSTEMS
FARROWING
DRY CONFINEMENT FEEDING
LIMITED FEEDING
AUTOMATIC WATERING
NURSERY FEEDING
SLATS & HEATING
GATES & FENCING
LIQUID FEEDING

AUTOMATED CAGE SYSTEMS
CHICK START & GROW CAGES
FLAT DECK
STAIRSTEP & DOUBLE DECK
TRI-DECK
4 DECK
CHAMPION FEEDING
AUTOMATIC WATERING
ENGINEERED EGG COLLECTION

TURKEY & BROILERS SYSTEMS
CHAMPION TROUGH FEEDING
AUGERMATIC PAN FEEDING
CHAIN-O-MATIC PAN FEEDING
WATERING SYSTEMS
TURKEY FEEDERS
BROODERS
CHICK STARTING FOUNTS
FEED METERING SCALES

OTHER SYSTEMS INCLUDE:
BINS & FEED AUGERING.
VENTILATION
AUTOMATIC AIR INLET
MANURE REMOVAL
MANURE DRYING
EGG PROCESSING

# National Goodwill Week May 5 through May 11

Steve Allen and Jayne Meadows will serve as co-chairmen of National Goodwill Week which will be observed May 5th through the 11th. This year's theme is GOODWILL ... A NATIONAL PRIORITY ... HELPING THE HANDICAPPED HELP THEMSELVES.

The week is observed annually to recognize and honor handicapped persons who have successfully overcome individual disabilities through trainging received at one of the 154 Goodwills across the U.S.A.

Locally, the Lancaster Goodwill has several events slated for Goodwill Week, according to Norman L. Schell , president of the Lancaster Goodwill. Opening the week will be Goodwill Sunday, with many churches in Lancaster County, taking part through special services or collections.

Lancaster Mayor Richard Scott will tour the Goodwill rahabilitation facility at 1048 N. Plum St., Lancaster on Monday morning May 6 at 8:00 a.m. to officially begin weeklong Open House activities. The mayor will also sign a proclamation for Goodwill Week in Lancaster at that time.

Open House will be conducted at the Lancaster Goodwill facilities at 1048 N. Plum St., Lancaster from 8:00 a.m. - 4:00 p.m. Monday thru Friday, May 6-10. Everyone is invited to tour the workshop facilities as well as view a display of trophies and presentations made to Joyce Burkholder of the Lancaster Goodwill. Joyce is National Goodwill Worker of 1973, and has toured the nation during the past year as the official ambassor of all member Goodwills.

A Goodwill Spring Fashion Show will be held in the Goodwill retail store at 28 W. King St., Lancaster on May 10 at 7:00 p.m. Models will fashion numerous spring outfits donated to Goodwill by local retail stores and individual contributors.

Culminating Goodwill Week will be Lancaster Goodwill's 2nd Banquet held on Saturday evening, May 11 at 6:30 p.m. at the Lancaster Catholic High School. Awards of appreciation will be presented to various media and volunteers who have given their time and services to Goodwill during 1973. Guest speaker for the evening will be Dean Phillips, National Executive Director of Goodwill Industries of America, Inc.

Store sales at all four Goodwill stores in Lancaster, Manheim, Ephrata, and East Earl will run throughout Goodwill Week. Items from clothing to furniture will be on sale, with fantastic savings on Friday and Saturday especially.

**Selecting a Pattern**

What looks good in denim? Everything and everyone! Males and females both agree that denim, from top to bottom, is the modern look of our times. It has body, tailors nicely, and it presses into crisp pleats and gathers. The twill weave of denim requires that pattern pieces be laid out in a one-way direction - use "nap" lay out and yardage.

**The Truth?**

Buy now, pay later! Easy credit is what makes a lot of people uneasy later. They should say, Buy now, Sweat later.

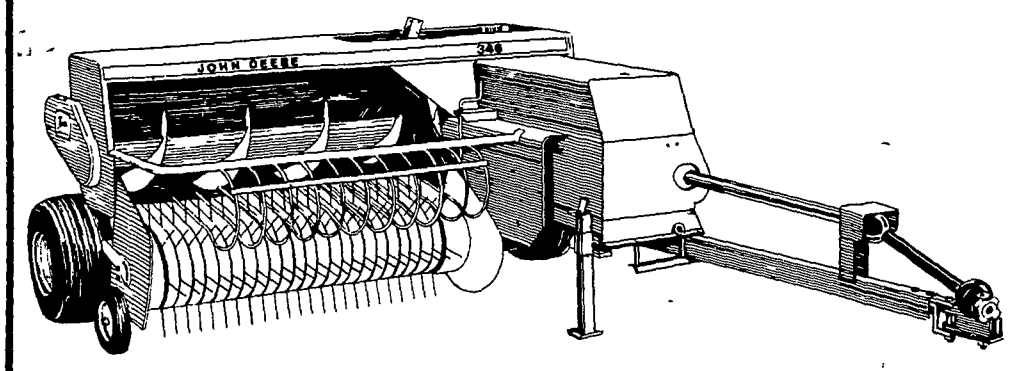
Strong, Silent 346 Baler
makes less noise while it bales more hay



A quick glance reveals clean, uncluttered styling. But good looks of the 346 Baler goes much more than skin deep
The striking absence of chain spells quiet operation and low maintenance The exclusive equal-angle hitch reduces powerline vibration and chatter, smooths out corners. The V-belt-driven pickup and feeding auger, roller-mounted plungerhead, and gear-driven knotter run quietly and require minimum maintenance.
The 71-inch-wide pickup with 144 teeth, giant 289-square-inch feed opening, and 80 30-inch-long plungerhead strokes per minute set today's capacity standards.
Stop in and see the 346 now.

Francis G. Strause

# 2 Area Managers For Pennfield

Pennfield Corportion has added two new area managers to its Feed Marketing Division, it was announced by Joel C. Habegger, division manager. Francis G. Strause has been assigned to the Dairy and Livestock Division and David R. Delaney to Poultry Feeds.

Strause successfully completed a sales training program offered by Pennfield prior to his assignment. He is a graduate of Penn State University and holds his degree in agricultural business management. He is a native of Berks County and resides in West Lawn, there.

Delaney, a graduate of Melrose High School in Massachusetts, attended Millersville State College. Before joining Pennfield, he was a sales representative for New Holland Supply, Inc. He, his wife, Joyce, and their two children live on Edgemont Drive in East Petersburg.

# Clean Haymaking Equipment Controls Alfalfa Disease

Farmers can help control the spread of anthracnose in alfalfa by properly cleaning their equipment between fields.

According to Sperry New Holland, research conducted at the Pennsylvania State University shows the fungus which causes anthracnose can be carried from one field to another in debris clinging to hay mowers, conditioners and balers. The fungus can also remain alive for several months on machinery in storage, the research shows.

Farmers are encouraged to wash their machinery when moving from one field to another. This can be done using water and a little household chlorine bleach.

Dr. Felix L. Lukezic, associate professor of plant pathology at PennState, said the fungal spores are carried on horizontal fixed surfaces of equipment. Anthracnose does not survive on moving parts of machinery, where the crop is compressed, he explained.

Anthracnose has been one of the most severe problems alfalfa growers must face each year. Only recently have new varieties been developed with substantial resistance to the disease.

Anthracnose weakens alfalfa plants, making them subject to winter kill, reduces protein content and lowers yields.

Postal propaganda--it's said that if a moth flies toward you, you will receive a letter.

## Doctor in the Kitchen®

by Laurence M. Hursh, M.D.
Consultant, National Dairy Council

**Nutrition A La Carte**

- Scientists are now discovering that poor nutrition in the first three years of life prevents full mental development, and that this can't be entirely corrected. The tragedy of this is apparent in that it's estimated that two-thirds of the world's children--300 million youngsters--are undernourished and have some degree of growth retardation.

- Food is the soucre from which you replace material your body loses. Bone, fat, muscle, organs, blood--all these things need constant replacement in your body. You may be exact duplicate of what you were a year ago, but you are to a very large extent of new substance. This is why proper eating is so important.

- The three methods for cooking vegetables to nonserve as much of their nutrients as possible are: Steaming, pressure cooking, or cooking quickly in a covered pan with only enough water to prevent scorching. You'll save vitamin C if you cook vegetables only until they are done--no longer.

- As one of the four food groups, dairy foods are important because these foods are your very best source of calcium. You need calcium, even when you're an adult, for upkeep of bone and for proper functioning of nerves and muscles. Milk and its products are important, too, for protein, and the B vitamin riboflavin, as well as other vitamins and minerals.

- There are some warnings you should heed about losing weight. Starving yourself is the wrong answer. It can upset your body chemistry including decreasing your muscle more than fat, and if continued too long it may create permanent damage involving vital functions. If you have a serious weight problem, see your doctor.

- Here are ways to help your preschool child. Serve small portions of foods, like smaller glasses of milk or juice; also medium temperature foods, rather than too hot or cold. And finger foods are easier to tiny hands to handle, like wedges of egg or tomato, or little cubes of meat or cheese, or carrot sticks.

Fats are a chief source of energy, and some vitamins. But that's not all. Fats make our foods more appetizing. They also delay the time your stomach takes to empty. This makes meals "stick to your ribs" and you don't have to eat again as soon.

**Flat-Felled Seam**

Stitch a plain seam, but with wrong sides together. Press seam open then press both seam allowances to one side. Turn the under seam allowance to ¼". Turn under the raw edge of top seam allowance and pin over the trimmed edge. Topstitch close to the fold. This seam is often used on jeans and western style garments.

# Charles A. Itle To Manage Dairy Show and Expo.

Sectreaty of Agriculture Jim McHale has announced the appointment of Charles A. Itle, State College, as manager of the Pennsylvania All-American Dairy Show and Keystone International Livestock Exposition.

The Cambria County native will receive $15,296 annually. The appointment was effective April 15.

The two internationally renowned shows are held annually at the Farm Show in September and November, respectively, and in the past have attracted entries from virtually every state in the continental U.S., Canada, Mexico and visitors from around the world.

Itle was selected by a committee made up of representatives from the Pennsylvania Dairy and Allied Industries Association, Pennsylvania Livestock and Allied Industries Association and the State Farm Products Show Commission.

Since graduating from Pennsylvania State University in 1960 with a B.S. in dairy science, Itle, 36, has been with the Cooperative Extension Service as an associate county agent in Crawford County and most recently in Centre County.

Prior to transferring to the Centre County post, Itle was on a leave of absence to complete requirements for a M.S. degree in agricultural economics at PSU. He also served 18 months as a lieutenant in the U.S. Army.

The new show manager is married to the former Nancy C. Harteis, also of Ebensburg, and they are the parents of five children.

# Eby Herd Cited by DHIR

Milk and butterfat production levels established by Registered Holstein cows in this area have been reported by Holstein-Friesian Association of America. All cows are from the herd of Donald S. Eby, Gordonville RD1, enrolled in the Dairy Herd Improvement Registry (DHIR) official testing program.

Cows recognized for their exceptional food producing ability are:

Breezy-Glen Archie Maudella, 4-2, 19,770 pounds milk, 820 pounds fat, 4.1 percent test in 336 days milked.

Breezy-Glen Apollo Jasper, 6-5, 17,810 pounds milk, 780 pounds fat, 4.4 percent test in 305 days milked.

Breezy-Glen Jack Julia 4-2, 20,220 pounds milk, 786 pounds fat, 3.8 percent test in 305 days milked.

Breezy-Glen Jack Snowflake, 5-2, 21,390 pounds milk, 754 pounds fat, 3.5 percent test in 305 days.

Breezy-Glen Ivanhoe Vichi, 10-2, 17,280 pounds milk, 741 pounds fat, 4.3 percent test in 305 days milked.

Breezy-Glen Samson Harriet, 2-0, 15,590 pounds milk, 695 pounds fat, 4.5 percent test in 305 days milked.

Breezy-Glen Ivanhoe Nancy, 12-6, 15,890 pounds milk, 636 pounds fat, 4.0 percent test in 305 days milked.

Breezy-Glen Jack Heidi, ^ 11, 14,920 pounds milk, 587 pounds fat, 3.9 percent test in 302 days milked.

**Fabric Mixes**

Suede and leather-looks combine well with denim for back-to-earth garments with your own personal touch. All-cotton corduroy also looks smart when it serves as a yoke for all-cotton denim pants or a jacket. Pockets of contrasting-color fabric take your rugged Western look right into the 70's. Another great look is pants of solid denim with a vest or shirt of a denim print or stripe. Combine any garments or parts of garments in this way for a Wild West look that's all NOW.

A Semitic legend says the lily sprang from the tears of Eve when she was expelled from the Garden of Eden.

# Industrial Products Committee Named

The joint committee of the Lancaster Manufacturers' Association and Chamber of Commerce announced the membership of the show committee who will coordinate the upcoming "Products on Parade" Industrial Exposition to be held at Park City Shopping Center, October 8 through 12. Serving as co-chairmen are: Vincent K. Alexander, president of Manheim Manufacturing and Belting Company and John Mullineaux, sales manager, store division of Penn Dairies, Inc.

Joining the local co-chairmen in their efforts to hold the largest industrial exposition in the County's history are: Robert E. Patterson, vice president, K-D Manufacturing Company; John Brett, also of K-D; W. Kent Kise, president, Hamilton Metal Science Division, HMW Industries, Inc.; Dennis Kowal, material superintendent, Donnelley Printing Company; Edward J. Rowen, president, Susquehanna Glass Company; Gerald L. Molloy, executive vice president, Lancaster Chamber of Commerce; Charles W. Bartells, general manager, DeWalt Division, Black & Decker; and Dean H. Keller, executive director, Manufacturers' Association.

According to the committee, over 300 invitations to county manufacturers have gone out in the past two weeks. Their goal is to gain one third or over one hundred participants for the October show. Early indications have shown that this goal will be reached.

Lee Drukenbrod, executive vice president of Park City Associates, in a statement to the committee, expressed extreme confidence in the success of the show. He added than an exhibit of this calibre is a great asset to local industrialists because it gives them the opportunity to get their products in front of the end consumer and at the same time emphasizes the excellent manufacturing and technological achievements of Lancaster County to the thousands of tourists who visit the area.

Ida Risser

May is the month of flowers and Spring sunshine. I've decided the element of surprise is one reason I enjoy walks in the fields and woods.

A hen pheasant rises to flight at my feet and sends shivers through me. There is a forgotten apple tree in a fence row with red-pink buds bursting into beautiful pale pink blossoms. And under it I find white violets for a tiny two inch vase at home. Then unexpectedly I see a wild flower which I feared had disappeared from our farm. Not for 30 years had I seen its heavenly blue periwinkle-like blossoms along the Conestoga River (it is officially a river now and no longer a creek).

Sometimes there are unpleasant suprises like finding six trees in a row chopped down without anyone even asking permission. But generally speaking "trampers" can not only learn about nature, but come home in a better state of mind.

xxx

We've taken one more step to save the soil on our farm. All of the fields have been laid out in contour strips and now we've put in a long sod waterway.

Since the new highway was built through the farm we have had a big problem with water after a heavy rain. We're hoping that planting redtop and Reed canary grass will reduce the erosion rate.

The law tells us that by 1977 all farmers who plow or till the soil will be required to have an erosion and sedimentation control plan.

xxx

Some people have told me they would like to hear more about our week's stay in Seattle Washington in March. So I'll try to describe some of the things we saw in the Old Curiosity Shop at Pier 51 on the Alaskan Way.

I found some of the following very interesting and other plain grotesque and bizarre. There were fleas in dresses (looked at through a microscope), and also the Lord's prayer printed on a pin head and on a grain of rice. There was a 67 pound snail, the largest jawbone of a whale, a 6 ft. giant crab, and all types of guns and swords.

We also saw a two-headed calf, a 6 ft. mummy found in the desert in 1895, shrunken human heads, a 10 ft. rattlesnake skin and many finely carved totem poles from Alaskan Indians. Many items were for sale such as ivory figures, sea shells, furs, Indian turquoise jewerly, wood carvings, ships in bottles and many others.

# Recycle Poultry Waste

Large-scale poultry operations can recycle poultry waste as feed on an economical basis, a U.S. Department of Agriculture (USDA) report said recently.

The study, prepared by USDA's Economic Research Service (ERS), examined economic aspects of recycling layer and broiler wastes from poultry and feeding them to livestock and chickens. It found that dried layer waste (DLW) can be processed and fed back to poultry on at least a break-even basis in 50,000-to-80,000 size laying hen operations. It is not a break-even operation for the smaller, family-size poultry farms, the study showed.

The cost of drying the layer waste was $25, $30, and $46 per ton, respectively, for flock sizes of 80,000, 50,000, and 10,000. Results from feeding trials indicate that up to 12.5 percent DLW in the feed ration did not adversely affect egg production and feed efficiency. At higher precentages, egg production and feed efficiency were reduced. Both body weight and egg weight declined when 20 percent or more DLW was included in the ration of laying hens.

DLW can also be fed to dairy and beef cattle. The ERS report said that beef cattle rations containing up to 30 percent DLW have been fed without significant adverse effects on performance and carcass quality. Ground and ensiled broiler waste likewise produced no negative effects on the carcass quality of beef cattle, though feed efficiency tended to be lower when ground broiler waste was used. The major problem with feeding DLW to beef cattle was found to be its palatability.

No Other Protein Need When You Feed

SPECIAL TANVILAC

Feeders Say . . .
"The Most Economical Feeding Plan of All"

No trouble with scours or cattle going off feed. You'll be more than satisfied with our feeding program for you'll get healthy stock, quick gains at low cost. Remember, there's a FEED LOT PROVEN TANVILAC CULTURE PRODUCT FOR EVERY FARM-FEEDING PURPOSE.

# Wine

(Continued from Page 1)

far as the wine industry is concerned, labrusca varieties are very hardy plants.

Vinefera are the very best wine grapes, but they are extremely difficult to grow. Miller feels certain that American viticulturists will eventually master the art of growing these tender-skinned French grapes, but he didn't feel he should start out with vinefera. The hybrids he picked combine lubrasca hardiness with a good measure of vinefera quality.

Could a Lancaster County or Pennsylvania wine industry ever compete with giants like California's Gallo Brothers? "Not on the basis of price and quantity," Miller said. "I think the key to our success here will be the quality of the product. If we start with French hybrids, we'll be a cut above the cheaper wines. I'd like to see a vin ordinaire - ordinary wine - in Lancaster County. In France, as you go from region to region you can order the vin ordinaire and each has its own special qualities."

While Miller thinks growers here should start with French hybrids, he feels the real rewards will come to those who are successful with vinefera.

How does the wine market look in the years ahead? "There's no way in the world that grape production can keep up with the booming demand for wine," Miller said. "Young people today are rejecting liquor, and they're turning to wine, instead. They start with the cheaper, pop wines, and as they become more discriminating they go on to better wines. I think there's where Lancaster County can become important - in producing the finer wines."

Many of Lancaster County's farmers won't drink wine or any other alcoholic beverage because of their conservative backgrounds. Could this attitude slow the development of Lancaster County vineyards? "A lot of them won't use tobacco, either, but they sure do grow it," Miller said. "You shouldn't think of wine as booze, anyway. It's food. You drink wine with a meal because it enhances the flavor of food. Liquor kills it."

"Besides," Miller added, "a farmer can earn a lot more from grapes than he can with tobacco. An acre of grapes can gross from $1500 to $2000 a year. Tobacco will return $800. And I don't think there's really that much difference in the amount of work."

First year expenses for a vineyard can be high, from $1500 to $2500 an acre for vines and wire trellises. And a beginning grower must wait three years for his first harvest. But once a vineyard is established, maintenance should be very cheap, according to Miller. Spraying and tractor fuel are virtually the only maintenance costs.

The heaviest labor requirement in grape growing comes, of course, during harvest which is mid- to late October. During the cold months vines must be pruned and tied up to the wire trellises, and there is some spraying and cultivating in the summer. Miller feels he can easily handle his ten acres, and reported that it's not at all unusual to find 50-acre vineyards in New York where all labor is supplied by the family.

Not every farm, even in Lancaster County, is suitable for vineyards, Miller pointed out. He said site selection is the most important step in getting started, and feels that expert help is a vital necessity. One good source of help is the county extension office, which is where Miller started. Soil type, air drainage, and the frost-free period are the most critical considerations in selecting a site. Usually, if a site is suited for orchards, it's suited for vineyards.

One thing Miller thinks favors a wine industry in County, two in Bucks County with two more in the planning stages, and Lancaster County's own Pequea Valley Winery. All these and any other state winners will be required to use Pennsylvania grapes, and a lot of them. H. Peterman Wood, for example, owner of the Pequea Valley Winery, expects his eventual requirements to exceed 200 acres.

"There's a great future here in the wine grape industry," Miller said, "but Pennsylvania is the fact that the Limited Wineries Act requires state wineries to use only grapes grown in the Commonwealth. There are several wineries in Erie it'll take a lot of work. One thing I think we need is more farmer input into research, and we need to get more Penn State people interested in wine grapes."

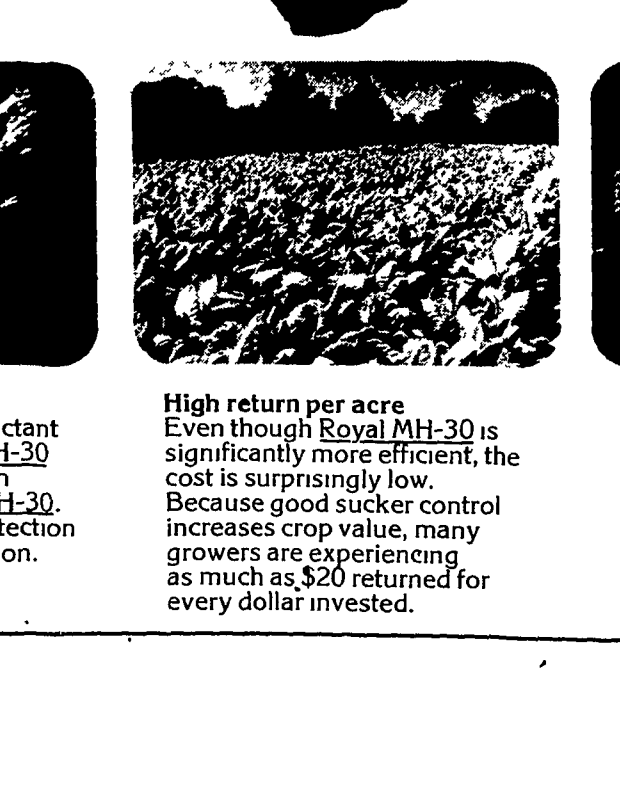
UNIROYAL
Royal MH-30®... the only one good enough to replace reliable MH-30.®



Each season, more and more tobacco growers are switching to Royal MH-30 growth regulant.

They've watched it perform on neighbor's fields, they've seen the results of University trials, and are convinced it's the most effective systemic sucker control available.

Royal MH-30 gets into the plant and working in half the time of regular MH-30, greatly reducing the danger of wash-off from unexpected afternoon showers. In trial after trial, Royal MH-30 has consistently proved to be 25-35% more effective, and even kills small suckers that have emerged on tender, fast-growing tobacco. This year, some chemicals are going to be in short supply so talk to your dealer today and arrange for enough Royal MH-30 to treat your crop. It's the best systemic sucker control money can buy. Looking for a product to control early suckers? Talk to him about Royaltac,® the outstanding new contact chemical. From the world's leading producer of tobacco growth regulants ... Uniroyal Chemical, Division of Uniroyal, Inc., Naugatuck, CT 06770.

As with any growth regulant, always follow instructions on the label
*Trademark of Uniroyal, Inc

**Faster than MH-30**
Sorbatran,* a special surfactant ingredient, gets Royal MH-30 into the plant and acting in half the time of regular MH-30. Gives effective sucker protection within 6 hours of application.

**High return per acre**
Even though Royal MH-30 is significantly more efficient, the cost is surprisingly low. Because good sucker control increases crop value, many growers are experiencing as much as $20 returned for every dollar invested.

**Easy to apply**
Royal MH-30 is easy to apply either by tractor sprayer or compressed air shoulder units. Check with your dealer about a Royal MH-30 program for your acreage today.

# Dairy

[Continued from Page 1]

task force has received over $10,000, about half of which came from members of PennAg Industries." PennAg is a trade association of agribusiness firms, with headquarters in Ephrata. Kish said the Atlantic Breeders Cooperative, Northeast Breeders and several pharmaceutical firms have also been big contributors. The task force hopes to get another $17,000 from industry.

"But we wnat to get our story out to the dairy famers, too," Kish said. "There are 600,000 cows in this state, and if the average cow is losing $70 a year because of health problems, we feel dairymen should be more than willing to help solve those problems. We're asking individual dairymen to contribute $10 apiece to the project."

Dr. S. B. Guss, Penn State's well-known extension veterinarian, told the group that Pennsylvania had the potential for developing a dairy breeding herd second to none, but first health problems have to be licked. Guss said the health problems were of three main varieties. Contagious diseases, such as TB, brucellosis, VD, IBR, shipping fever and diarrhea can be handled with vaccines. Pennsylvania was one of the most zealous states in ridding its dairy herds of TB and brucellosis, and the early and consistent adoption of artificial insemination techniques have eliminated most venereal diseases.

problems were of three main varieties. Contagious diseases, such as TB, brucellosis, VD, IBR, shipping fever and diarrehea can be handled with vaccines. Pennsylvania was one of the most zealous states in ridding its dairy herds of TB and brucellosis, and the early and consistent adoption of articial insemination techniques have eliminated most veneral diseases.

Infectious diseases, those which can be caused by mismanagement, include foot rot, mastitis, baby calf losses and so forth. Nothing but better management can cure these, Guss said.

Metabolic disorders were the final health problems which Guss discussed, and he said these strike possibly even more often at the most capable operators. And it is these problems that the dairy herd health study would most like to investigate.

"Metabolic problems have increased drastically in the last 25 years," Guss told the group. "These disorders don't all have clear cut characteristics, but they all seem to be related to increased production, the kind of feed we're giving these animals and the kind of soil that feed is grown on. Milk fever, anemia, estrus problems, arthritis in older cattle, fragile bones in younger ones – these all seem to be related to trace element deficiencies, mineral imbalances, deficiencies and even excesses.

"The pressure on producers who have large financial commitments is tremendous. They've got to get everything they can out of their cows, and to do that, they've got to push all the forage they can into their animals. So we have real sharp operators, doing everything they can to maximize production, and running into problems they can't solve."

Penn State's approach to the problem is an interdisciplinary one, Dr. Walter Thomas pointed out. Thomas was representing Dr. James Beattie, dean of Penn State's College of Agriculture. He said any funds raised by the task force would be used not only in studying herds, but in looking at the quality of the feed the animals get and the way that feed is grown.

"It is obvious that many talents are needed," Thomas said. "Thus, our interdisciplinary group on this project includes animal and dairy scientists, agronomists, veterinarians, horticulturists, and personnel from the U. S. Pasture Research Laboratory at University Park."

Dairymen who wish to contribute to the research project can do so by sending a check directly to Dr. Robert Flipse, Room 229, Agricultural Administration Building, Pennsylvania State University, University Park, Pa. 16802. Checks should be made out to Penn State, and marked "For Project 1870".

# Homestead Notes

# Goodwill Worker Overcomes Vast Obstacles

by Mrs. Charles McSparran Farm Feature Writer

As Miss Joyce M. Burkholder, Martindale, completes her reign as National Goodwill Worker of 1973 this week she has many fond memories, many mementoes, has traveled across our nation visiting many cities, has met illustrious personalities and has had many interesting experiences. She has indeed been a credit to Lancaster County.

May 5 - 12 is National Goodwill Week and Lancaster County Goodwill Industries is encouraging people to take a tour of their workshop at 1048 N. Plum Street, Lancaster, to see what people are doing there. Visiting hours are 8 A.M. to 4:30 P.M. Monday through Friday. They are also anxious that people visit their four stores which are located at 28 W. King St., Lancaster; 39 Market Square, Manheim; 560 S. Reading Rd., Ephrata and East Earl, R.D.2. This store is located just off route 625, in the old clothing store operated by Goods. The clothing sold at this Goodwill store is not reconditioned and cleaned but is sold as is, rummage sale style. Their furniture is reconditioned, though, as it is at the other stores. The stores open at 8 A M. and are open until 5 P.M., or later in some cases. The stores are open until 9 P.M. on Fridays and some of them are open Monday or Tuesday evenings until 9 P.M.

There are 19 Goodwill collections boxes in Lancaster City and County. They are placed at convenient locations in most of the small towns in the county. Look for the nearest one to you and when you are house cleaning and sorting the family's clothes this spring take any usable discarded merchandise there. If you have furniture to dispose of, call Goodwill Industries and arrange for their truck to pick it up. You will not only find a solution as to what to do with the things you can no longer use but you will be doing a real service to Goodwill Industries. Joyce says, "The materials that are donated to Goodwill Industries become the tools that we use to repair the human beings." All the textiles, shoes, furniture, television and radio sets, housewares, books, small appliances and toys are recycled.

Joyce us a shining example of what Goodwill Industries can do for individuals. Having survived almost unbelievable tragedies, it is just a miracle that she is alive. Her fortitude and courage have been and are a challenge to many who come to Goodwill Industries where she is on the staff and serves as a recruiter.

She is a daughter of Mr. and Mrs. Ralph Burkholder, Akron. She lived on a farm until she was 21 years old. Her father farmed his father's farm where he had feeder steers, cows, pigs, chickens, sheep and horses. After leaving this farm at Leola he farmed on the halves. He is now a machinist at Calder Door in Lancaster.

At six years of age Joyce contracted rheumatic fever, had to learn to walk again and was left with a heart murmur. Then she had a lot of trouble with the muscles in her legs.

December 10, 1956 she was in an auto accident and brain damage resulted. A few months of her life were completely lost as far as she can remember. The brain damage left her with speech problems,-her mind and voice didn't work together. She said "So many people began to treat me like a retarded person." However, she came out of this with a determination to do what her friends were doing. She graduated from Upper Leacock High School as the most outstanding female athlete in 1957.

Joyce worked at Airestock Nursing Home from 1957 to 1961. At the same time she decided to go in training for a registered nurse at the Lancaster General Hospital. Having lost time after her accident the first semester of her senior year in high school she needed more chemistry so was privately tutored in that. It was permissable to receive a license through waiver However, the law changed in 1970 so she worked three years for nothing She didn't have enough credits in chemistry plus they thought she had tuberculosis. Fortunately she did not She ended up selling her horse and had to sacrifice everything

She became discouraged and started to work at Indian River Hatchery and later at Babcock Hatchery in Lititz. She enrolled in the American School of Chick Sexing in Lansdale, Pa She went to school part time and worked part time under the head sexer in this area for about one and a half years She had to buy chicks that were under 72 hours old to practice on Preferably chicks should be sexed the first 24 hours of their like Chick sexing is a very delicate operation and there is much knowledge and proficiency required plus a lot of expense in learning it. Febraury 1969 she asked to take her first test In the test you are required to sex 200 chicks in ten minutes and must be 98 percent accurate. Culls are used to practice on but in the test the chicks are first grade. By the way, chick sexing was developed by the Japanese people right after World War II. When Joyce took her test in February 1969 she had 97 per cent accurateness. In the test you are required to sex 100 Leghorns and 100 broilers (heavy breed birds). It is harder to sex broilers than Leghorns.

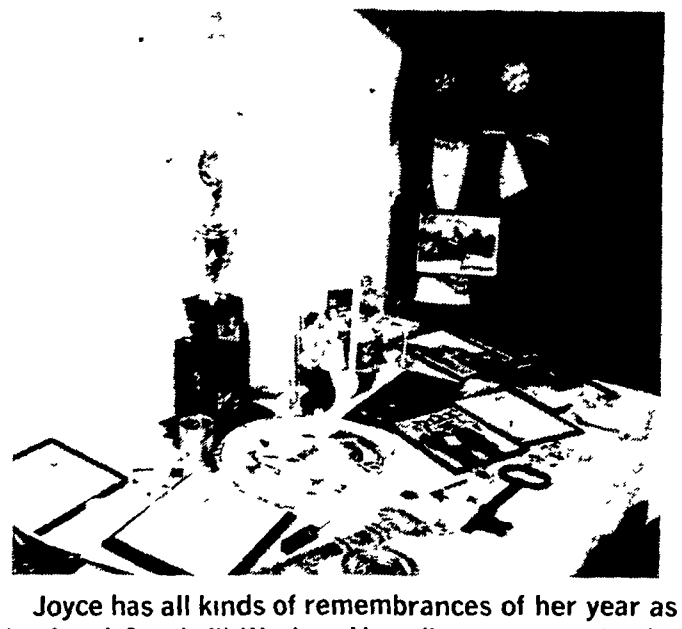
May 25th of that year Joyce lost her right arm by getting caught in a power take-off on spraying equipment while helping her brother-in-law repair a pump. This was a terrifying and tragic experience but her recovery was miraculous. Later Easter Seals and the Bureau of Vocational Rehabilitation purchased an artificial arm for her.

After this Miss Burkholder worked part time for Girvins Greenhouse, Leola, two years of it full time. She has worked two jobs most of her life. At Girvins she made deliveries over the eastern part of Lancaster County and was their geranium grower. Later she worked full-time cutting roses for six months.

July of 1971 Joyce went on a picnic. She and her sister were wrestling and horsing around and Joyce tore all the ligaments and cartilage in her left leg. She was put in a cast from her ankle to her hip.

All of these tragedies made her do some thinking so she talked to God. She said "God, why didn't you let me die? From this day forward this life is yours and you can't help but have a purpose."

It was then that she noticed a little ad in the paper that she had missed every time she read that paper, and she had read it many times. It was put there by Goodwill Industries. At the time she had a gearshift car so she designed her own car equipment and had it put on the gearshift. Then her brother sold her an old automatic Chrysler for $50. She went to work then for Goodwill Industries January 2, 1972. She entered as a trainee and selected radio and black and white television repair. She was having counseling. She said "I have to learn to get along with people. I had twelve weeks of dispatching training then I was ready to be placed in competitive industry and I decided I could be a help to Goodwill Industry and I had no college education. I'm the only one of the staff that isn't a college graduate. In May 1972 the Executive Director said he would give 30 days to prove myself.



Joyce has all kinds of remembrances of her year as National Goodwill Worker. Her album is open to the page of her presenting a nosegay to Mrs. Richard Nixon

Miss Joyce M. Burkholder, New Holland RD1, National Goodwill Worker of 1973 has had a full year of traveling and has received many honors. Lancaster County is justly proud of her.

"In June 1972 "Agnes" flood took my home and everything," Joyce recalled. Her very escape from the flooded house was nothing short of miraculous. "After the flood I realized that all my life, material things were important to me. I still had my life. Goodwill Industries staff collected $250 so I could go to the Goodwill store and get food, furniture or anything I wanted." Of course, she did just that.

Goodwill Industries has had a contest for selecting the National Goodwill Worker for at least five years. A contestant must be gainfully employed either by Goodwill Industries or by competitive industry. There were 100,000 people elegible for this competition last year and from that number there were 150 entries. Joyce was selected by Lancaster County Goodwill Industries towards the end of March, 1973 to be their contestant. A free-lance writer in Washington wrote her story. Joyce was selected for the East Coast contestant, Paula Rousso for the South, Fern Luce for the Mid-West and Joan Nelson for the West Coast. A panel of judges: Joan Crawford, Irene Foley, James Hagarty and Roger Sheldon selected Joyce. April 27th, 1973 Dean Phillips, National Executive Director of Goodwill Industries, called her and told her she had been selelcted at the National Goodwill Worker for 1973.

May 7th Joyce, accompanied by Dean Phillips, Sherry Kettering, Secretary, John Harman, Norman Schell, executive director of Lancaster Goodwill Industries and Kleo Wight, Joyce's roommate, started a whirlwind tour of Washington, D.C.

She met Caspar Weinberger, Secretary of Health, Education and Welfare. She did a "Voice of America" program, heard by one million people. She went to the National Press Club as guest of Donald Larrabee. Set met Senator Schweiker and Congressman Edwin Eshleman, who presented her an American flag that had flown over the capitol the day before. Joyce presented Mrs. Richard Nixon a nosegay of Bacara roses (the french rose of love and peace) and white carnations. Mrs. Nixon very graciously showed her through the White House and served her refreshments. If you don't know much about protocol at the White House and have the disadvantage of an artificial right arm this can be quite a frustrating experience and to be sure it was for Joyce.

She went to Arlington Cementery and visited Prsident Kennedy's grave and saw the Changing of the Guard at the Tomb of the Unknown Soldier. This happened to be the first day of the Watergate happenings and the day of the first resignation so President Nixon having summoned the Head of the Guardhouse, gave permission for Sargeant Johnson, the Commander in Charge of the Changing of the Guard, to leave his post and to welcome her. This was the first time ever such a thing happened. Joyce was frightened and a flash went through mind "What did I do?" But Sargeant Johnson very formally but graciously shook hands with her and welcomed her, he himself having a cleft palate.

While in Washington Joyce traveled in a limousine that President and Mrs. Eisenhower rode fourth place in the funeral procession of President John Kennedy, and Joyce had the same driver.

In June of 1973 Joyce, accompanied by her mother, attended the National Delegate Assembly in St. Louis where

# Goodwill Worker

(Continued from Page 26)

she received her large trophy and made her acceptance speech. She also met the other three regional winners. She met Raymond Burr, who was the speaker for the National Assembly. He invited her to see a filming of Ironsides at Century Studios in Los Angeles but she never got there because he had a heart attack.

During the year she also traveled to Indiana, Michigan, Iowa, California, Oregon twice, Boston, Mass., North Carolina, Maryland, Washington, D. C. twice – a week the first time and a one-day visit the second time. She toured a lot of facilities in Pennsylvania, 26 Goodwills in the nation, had about 50 TV appearances, took part in 60 to 70 radio shows and talked to service clubs.

This program is quite costly for Goodwill. Reader's Digest had formerly paid for it. One of the editors of Playboy Magazine raised about $12,000. by an auction to finance it during 1973. Strange, isn't it, when a Methodist minister started Goodwill?

Joyce's momentos are all highly prized but one of her most cherished is a light blue and white embroidered squares quilt given to her at a surprise party by 15 Martindale community women who made it. Others are keys to the cities of Waterloo, Iowa; Raleigh, N. Car.; Tacoma, Wash. and Adrian, Mich.; the city seal of Durham, North Carolina; state seal of North Carolina; a proclamation of Joyce Burkholder Day in Indianapolis, a proclamation of Joyce Burkholder Day in Adrian, Mich.; a myrtlewood plate from Portland, Oregon; a china cup and saucer from San Francisco; award certificates from Dubois, Pa. and Morgan Memorial, Boston, where Goodwill was founded; wooden beads from Eugene, Ore.; the United States flag from Hon. Edwin Eshleman; Song Of America book from George Mardikian who owns Omar Khayyanis restaurant in San Francisco; a book presented by a National Goodwill Industries of America in Washington, D. C.; a ribbon used in the dedication of a new Goodwill building in Charlotte, North Carolina; a scarf and the book "Jonathan" her mother bought her in St. Louis; a photo album with large pictures taken in Washington such as she and Mrs. Nixon which was presented to her by the National Goodwill office; her big trophy presented by the National Goodwill office and her trophy presented by the Lancaster Goodwill office as Lancaster Co. Worker of the Year; a gold plated four leaf clover from Fern Luce (a regional winner); a certificate of achievement from San Francisco Goodwill; certificates from service clubs, radio stations and rehabilitation agencies; a Pony Express Club which permitted her to ride in any pony express; a pewter cup from the National Association if Insurance Women, a pewter bud vase from Insurance Women; a gold plated bell from Lions International; letter openers from Lions clubs she spoke to; pictures of Senator Schweiker and Representative Edwin Eshleman taken with her; 3 letters from Joan Crawford and 2 from Governor Milton Shapp and a scrapbook of stories and publicity that is about 15 to 18 inches thick.

Another treasured possession Joyce received while she was the National Goodwill Worker was a picture of herself riding "Lee Wung", a very famous horse in Iowa. This horse belonged to Susie Klingman who was the National Hog Queen last year. This horse was raised on King Ranch. Joyce rode him in the Silver Spur Horse Show at Waterloo.

Before the horse show Joyce was taken on a tour to see the Iowa Amish country. It was quite interesting to compare their farms with the Amish farms in Lancaster County. The first thing she noticed was their windmills. They had small barns and their homes were smaller than here. They had bright colored curtains at their windows. One outstanding difference was old automobiles in their fields. They used the doors of the cars for animal shelters.

The first Goodwill was founded in 1902 in Boston by Dr. Edgar J. Helms, a young minister, who had a concern for handicapped people and initiated a plan with a theme "Not Charity but a Chance" – a chance to work. Handicapped people were taught to repair donated clothing and household articles and were given an opportunity to learn trades so that they might earn their own income. The repaired items were sold and thus the operation was financed. Today there are 154 Goodwill Industries in the United States.

Lancaster Goodwill Industries was organized November 8, 1968. There are 185 people connected with it now of which 105 are handicapped people, mostly in training, a few workers, the staff and the people who work at the four stores. It might be of interest to know that Ruth Ann Smith will be entering the National Goodwill contest this year from the Lancaster unit. Another thing to show the real spirit of human kindness that exists in the Lancaster unit begins right with the Board of Directors. Joyce, having used her artificial arm for approximately five years, is having some difficulties now with it. A new one will cost around $900 and the board of fifteen members are each going to share in paying for a new one for her.

Joyce Burkholder has three sisters and one brother. June is married to Wesley Hershey and lives on a small farm near Reinholds. Her brother, Ralph J., lives in the Royer Building in Ephrata and is the head chef at Haydn Zug's in East Petersburg. Another sister, Judy, is married to Ronald Fahrenbach. They have a general farm in Harristown. They raise hay and corn, feed steers and board horses. This is where Joyce keeps her 17-year-old mule and 30-year-old horse. The youngest sister, Jolynn, lives at home and works at Donnelley Printing Company, Lancaster.

Joyce has always had a keen interest in horses. When she was six years old, she met a woman from Philadelphia who had a hunter – a jumping horse. They visited each other for twelve years and this woman was Joyce's idol. When Joyce was 16 years old, this lady married a harness horse trainer and they moved to Saratoga, N. Y. After this Joyce was not able to find out where they went. In 1973 as Joyce flew into Columbus, Ohio, she was told that this city was the home of American Trotting Association. Through this clue she found her long lost friend.

Joyce used to ride professionally for Symbol Acres Farm on Quarry Road in Leola which is owned by Robert Wentz. She showed several of his horses as well as her own. His were three and five gaited horses; Joyce's was a western horse.

She used to ride her horse, "Star Dust" in the New Holland, Ephrata and Solanco Fair parades. This horse was a son of Golden Zephyr, known now as "Trigger Jr." and was purchased in Lancaster 16 years ago by Roy Rogers. Joyce has had her 30-year-old horse for five years and still likes to ride when she has time.

Another sport Joyce enjoys is bowling. She bowls in the Goodwill League every Thursday evening at Lancaster Lanes. She says "I'm one of the poorest bowlers, but I probably have the most fun.

Joyce attends Grace Baptist Church on the Marietta Pike. She belongs to the Handicapped Club, LARC, and is a member of Lancaster Association of Retarded Citizens.

Her roommates say Joyce is an excellent cook and cooks like the Penna. Dutch do. Here are a couple of her favorite recipes:

**PIGS IN THE BLANKET**

1 large head of cabbage
½ cup uncooked rice
1 pound hamburger
1 finely chopped onion
1 egg
Salt and pepper
Tomato sauce: 3 cups water
1 can cream of tomato soup
½ teaspoon sugar
Salt and pepper

Cook rice till half done. Remove center small leaves from the head of cabbage and place the whole remaining head of cabbage in boiling water. Cook till leaves peel off easily. Mix raw hamburger, the half cooked rice, onion and 1 egg. Season with salt and pepper. Roll hamburger into logs and wrap cabbage leaves around them. Stick toothpick in to hold cabbage leaves in place. Put them in sauce and cook very slowly for 2 hours. You may need to add a little water. Serves 6 to 8.

**CLAM PATTIES**

½ doz. big clams

Open clams, don't cook. Put them through food chopper and chop fine. While doing that, cook about 6 or 8 medium potatoes whole.

1 small loaf of bread
3 raw eggs
3 hard boiled eggs
1 or 2 stalks of celery, chopped
1 small onion, chopped
Salt and pepper

When potatoes are cooked, break them up some and add chopped clams. Break the bread into filling size pieces. Add celery, onions, raw eggs and chopped hard-boiled eggs. Add salt and pepper. Mix together. Take a scoop full and make a patty and fry in a skillet. You may stuff a cleaned clam shell and bake in a 350 degree oven for 10 to 15 minutes, until brown on top.

**JELLO AND ICE CREAM DESSERT**

1 package jello, any flavor

Make jello and let jell. Mix 1 pint vanilla ice cream with the jello with an electric mixer. You can add 1 small can fruit cocktail. Put in refrigerator. It will hold 6 to 8 hours in the refrigerator. It is a nice dessert to serve after a heavy meal.

# Modified Soap Washes Clean in Hard Water

Soap can be modified to make it wash just as clean in hard water as in soft water. As evidnce, a U.S. Department of Agriculture (USDA) scientist showed highly magnified photographs of washed fabric.

The pictures were micrographs magnified 600 times with a scanning electron microscope. Those of fabric washed in hard water with ordinary soap showed heavy deposits of calcium and magnesium soap formed on the fibers. No such deposits were visible in comparable micrographs taken of fabric washed in water of the same hardness but with soap containing a chemical called a lime-soap dispersing agent. The chemical prevents curd formation.

The modified soap was developed in Philadelphia, Pa., at the Eastern Regional Research Center of USDA's Agricultural Research Service. Research chemist Raymond G. Bistline showed the pictures, while speaking to members of the American Oil Chemists' Society who were meeting in Mexico City. Studies on the new soap were made by Mr. Bistline; Mrs. Susan M. Jones, who took the pictures; Wilfred R. Noble and James K. Weil, under the supervision of Dr. Warner M. Linfield.

The modification overcomes the only important limitation of soap, its relative inefficiency in hard water because of scum formation. Made from constantly replenishable agricultural raw materials and both safe and biodegradable, the new soap may lessen the nation's dependence on detergents, most of which are made from petroleum and contain phosphates.

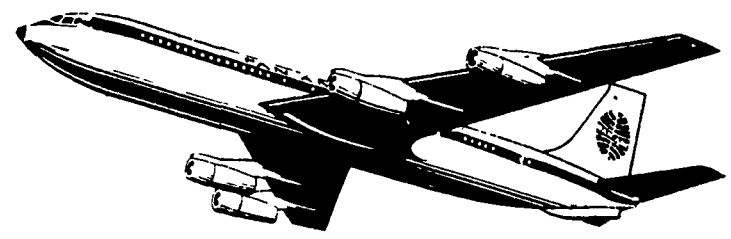
**Silence Is Golden**

Silence may be golden, but many of the speeches lately are mainly brass!

WATT & SHAND

Starts Friday at Both Stores!

DOWNTOWN LANCASTER and PARK CITY



96th Anniversary

SALE

EIGHT DAYS OF SAVINGS! This is the big one... Lancaster's greatest sale ... a value-packed two-store event that gets bigger and better every year. Savings galore for your family, your home, yourself! Don't miss this spectacular event at Watt & Shand . . . you'll really save money!

Win a trip for two to Spain Portugal and Morocco via Pan American

OUR GRAND PRIZE! It's the thrilling Pan Am "Sunburst" vacation, an all-expense-paid trip for two, arranged by Ridgeway Tours. If you win, you'll depart from New York's JFK International, dining aboard your Pan Am Jet In two short weeks, you'll experience everything from the castles and cafes of Spain to the Arabian Nights atmosphere of North Africa

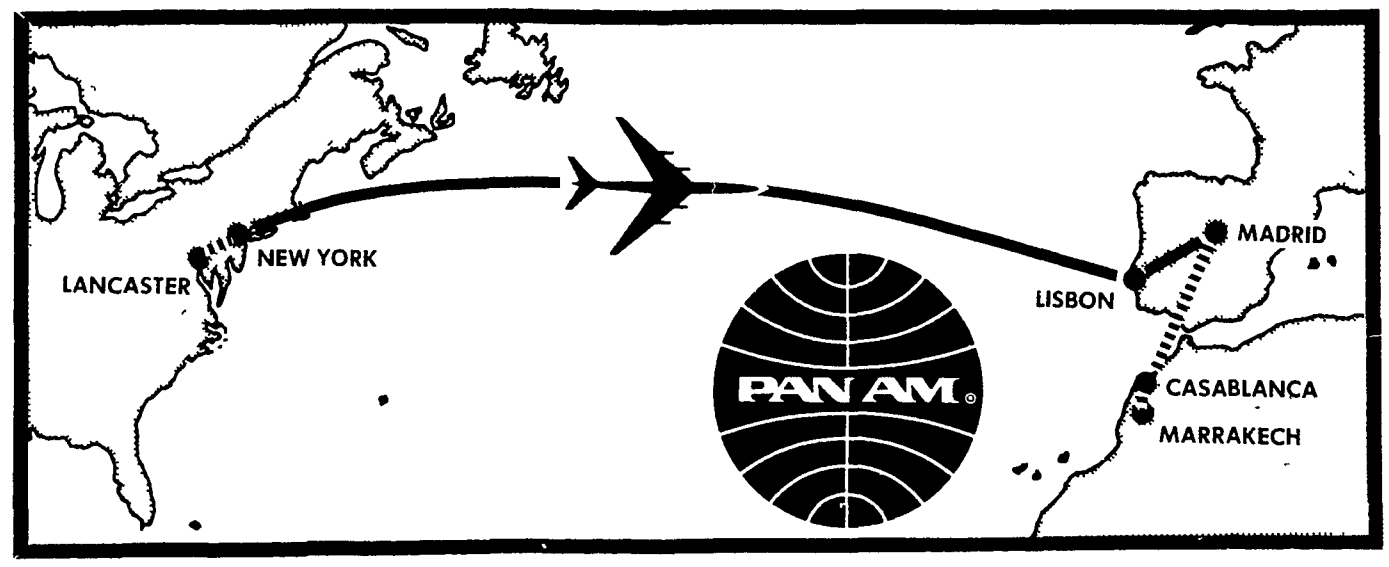
In Morocco, you'll enjoy an intriguing mixture of beauty and mystery. Cosmopolitan centers like Casablanca and Marrakech, contrasted with snow-capped mountains and desert sands.

Everywhere you go, you'll live luxuriously in first class hotels with private baths, enjoying delicious meals, sightseeing, night life, many extras. A cordial Pan Am host will greet you in each city, making sure your "Sunburst" vacation is truly carefree!



**BE SURE TO REGISTER** for this special prize on the second floor of either Watt & Shand store . . . Downtown Lancaster or Park City.

All adults other than Watt & Shand employees and their families eligible for this prize. No purchase necessary. Winner may choose an $800 shopping spree as an alternate prize

**DOWNTOWN:** FRIDAY AND MONDAY 9 30 TO 9
OTHER DAYS 9 30 TO 5
**PARK CITY:** 10 TO 9 30 DAILY

# LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

**Prevent Puckering In Sewing**

There is nothing more exasperating to the seamstress than a fabric which puckers as you sew. The puckering problem happens more with soft sheer fabrics because they are noted for their tendency to pucker as you stitch on the machine.

Puckering is most likely to occur on fabrics with relatively little "give," such as firm, closely-woven materials, soft woven sheers, and on woven fabrics with special finishes, such as permanent press. Puckering is also more likely to happen when stitching on the lengthwise grain of fabric rather than crosswise or on the bias.

If one or both of the thread tensions of the sewing machine are too tight, stitching on any fabric can be puckered. You may need to learn to loosen the tension. You can sometimes control puckering by loosening only the upper tension, but if loosening both tensions is necessary, follow the advice in the instruction book of your machine. The lower tension cannot be changed in some machines.

You may have to make a choice between an unbalanced stitch and seam pucker. If the machine stitch doesn't look perfect, you wouldn't want to use it for top stitching. But top stitching would be a poor choice anyway for a fabric that is likely to pucker.

The choice of thread and how you handle fabric as it is sewn will also make a difference. Select the size of thread and needle in relation to the fabric. A sheer fabric requires a fine thread and a small needle. Polyester or polyester core thread has elasticity and strength. Use very light machine tensions, however, and hold the fabric taut as it feeds through the machine.

Stitch with a long stitch – about 8 to 10 stitches per inch. A ball point needle may give better results. Modern fabrics dull machine needles quickly and needles may need frequent replacement. Always test stitch a piece of fabric you expect to use. Stitch and set it aside for a while to see if the thread relaxes and puckers.

Try to sew at a moderate and even speed. Change of speed and rapid stitching are more apt to cause skipped stitches and puckering. The needle hole should be small. The straight stitch throat plate is best rather than the all purpose zig-zag plate.

**Open Code Dating on Foods**

Open dates on some packages of perishable foods allow store personnel and consumers to rotate their stock and use the oldest packages first.

Open dates do not indicate when a product will spoil. They frequently are referred to as "sell by" or "expiration dates." These dates tell you the last day the product should be sold. But products are safe to eat and are not spoiled after that date. However, flavor and texture may not be as good as when fresh.

The cost of open dating and the return of products is paid for by increased food prices. Yet, buying products with the latest open date doesn't assure you of quality.

The key to keeping quality of perishable foods is proper handling of these foods in homes and stores. Maintaining temperatures of all perishable foods below 40 degrees, or zero degrees for frozen foods is essential. Processors have no control over how stores and consumers handle food. But the Pennsylvania Department of Agriculture has regulations covering dairy products and frozen food handling in stores.

Manufacturers welcome your comments on open code dating so they can locate problems in distribution channels. Most manufacturers guarantee their products and will replace any which spoil. But, make sure you maintain proper storage temperatures in your home for perishable foods.

**Welt Seam**

For bulky fabrics, a welt seam can help eliminate some of the bulk. After stitching a plain seam, press both seam allowances to one side of seamline. Trim the under seam allowance to ¼". From the right side, topstitch ¼" from the seam line catching the untrimmed seam allowance on the underside.

Difficult times never make the smart people frown. Because they know what to do.

They engage in some earnest fact-finding—reading and talking to experts. They think long and hard. Then they put their money where it'll be both profitable and secure.

Right now, many smart people are investing in certificates of deposit. The kind offered (with the absolute highest bank interest permitted by law) at Farmers National Bank of Quarryville.

Our six month certificate* pays 5½ percent, when you deposit a minimum $500. Our one- or two-year certificate pays 6 percent, with the same $500 minimum. We have a three-year CD, offering an attractive 6¼ percent, with $500 minimum.

And, finally, a big 7½ percent can be earned for leaving with us at least $1,000 for four years.

In these uncertain times, investing in Farmers National certificates is the smart thing to do. For smart people . . . like you.

**Farmers National Bank of Quarryville**

**Banking the way you'd do it.**

QUARRYVILLE West Fourth St. WAKEFIELD Rts. 272 & 222

*All Farmers National certificates pay interest semi-annually, with checks mailed to you. Federal regulations specify that a substantial penalty be assessed if certificates are redeemed before maturity.

Member Federal Deposit Insurance Corporation

# Farm Women Societies

## Society 5

Farm Women Society 5 held their meeting April 27, at the home of Mrs. Melvin Peifer. Dr. Loy Awkerman gave a talk and showed slides of the Payment of a Red Rose, how it started and still continues every June, for the rent of the Lutheran Church of Manheim.

Society 5 will give $50.00 to the Lancaster County Project for the Jaycee Camp for the Mentally Retarted.

On May 8 we will meet at East Petersburg Church of the Brethren at 9:00 to travel to York for our "Spring Rally".

May 18 our Mother and Daughter meeting will be held at the Parish House of St. Stevens United Church of Christ in New Holland. The program will be talent from our Society. Hostesses will be Mrs. Amos Mentzer and Mrs. Guy Musselman.

## Society 8

Farm Women Society 8 met at the home of Mrs. Helen Wivell, Columbia RD1, Saturday, April 20 at 2 p.m. Miss Anna Mae Eby presided and songs were sung by the group. Mrs. Charles Shank, at the piano played "The Lord's Prayer", as a tribute to Mrs. Marie Stoner, a member who passed away several days earlier. Miss Ruth Eby led devotions and read a memorial in honor of Mrs. Stoner who was a faithful, active member for many years.

The minutes were read by Miss Mary Grace Martin. The Treasurer's report was given by Mrs. Sylvester Shuman. The proposed budget was approved and accepted for the coming year.

Mrs. Harold Frey, on the Sunshine Committee reported having received a thank you for remembrance while ill, from Mrs. Richard Warfel. Mrs. Anna Chapman is in the Columbia Hospital, Room 101, having had cataracts removed from both eyes. Mrs. Ada Greider is in the Lancaster General Hospital. A special surprise fruit basket gift was presented to Mrs. Clinton Eby as she and her husband celebrated their 50th wedding anniversary a week ago.

On Monday, June 17, members will go by bus to Gettysburg. They will leave St. Marks Church, Mt. Joy at 8:30 a.m. and return in the evening.

Mrs. Margie Heisey, special speaker gave a detailed account of four women of the Bible. These varied descriptions were of interest as she told of those who lived during different times of Bible History.

The social time was enjoyed as Mrs. Helen Wivell, Mrs. Lewis Bixler and Mrs. Dorothy Sumpman served colorful, tasty refreshments.

The next meeting will be held May 18 at 2 p.m. at the home of Mrs. Harold Ney, Marietta RD1. The Program will be Macrame.

The Spring Rally will be held on May 8 at York, Pa.

## Society 26

Farm Women Society 26 held their meeting at the home of Mrs. David Garber RD1, Marietta. Mrs. Marian Campbell from the Lancaster Chapter, Pa. Assoc. for the Blind was the speaker. Fifty dollars was donated to the organization, and another $50 to the County project.

Mrs. Leroy Esbenshade was co-hostess and Mrs. Henry Greiner held devotions. The Society made favors for the Blind Assoc. as their work project.

The next meeting will be a luncheon held May 23 at the Lancaster Church of the Brethren, where Society 11 will be entertained.

## Society 27

Farm Women Soceity 27 met at the home of Mrs. Raymond Martin on April 23. Co-hostesses were Mrs. John Hershey, Mrs. Sam Heineman and Mrs. Robert Dunkleberger. Society 27 entertained the County Officers and Soceity 12.

Mrs. Buzzard, the guest speaker, presented an inspirational message, titled, "The Parable of The African Violet".

"Bringing Cheer" will be practiced by the Society for the May 28th meeting. The Soceity will form into small elderly friends from the Mount Joy area who are confined to their homes.

Members will meet later in the evening at the home of Mrs. Luke Brubaker for their meeting.

**Speaking Of The Devil . . .**

Considering what a lousy location he has, the Devil does a right brisk business.

**Getting Old?**

You know when you're getting old when you whistle at girls and they think you're calling your dog.

## Farm Women Calendar

**Saturday, May 4**

2:00 p.m. - Farm Society 6 meeting, home of Mrs. Harry Shonk, RD4 Manheim.

Farm Society 28 sub sale.

**Wednesday, May 8**

Farm Societies "Spring Rally", Memorial Hall, York Fairgrounds.

Farm Women Society 14 mother - daughter banquet, Black Rock Retreat.

**Thursday, May 9**

12:30 p.m. - Farm Women Society 9 will entertain Society 25 at covered dish luncheon, Colemanville United Methodist Church.

**Friday, May 10**

6:15 p.m. - Farm Women Society 1 mother-daughter banquet, Brunnerville Fire Hall.

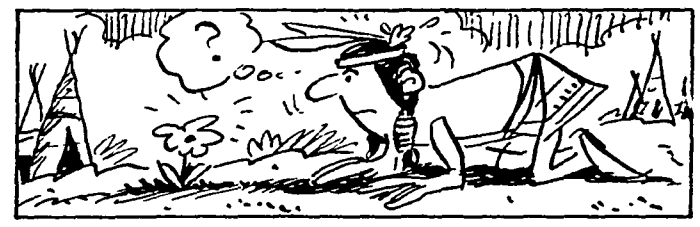
7:30 p.m. - Farm Women Society 13 meeting, Mrs. Irwin Leaman and Mrs. Paul Gehman, hostesses.

**Saturday, May 11**

Farm Women Society 25 mother-daughter luncheon, Historic Strasburg.

**Braid & Trim**

Ethnic and peasant braids of any width look terrific when teamed with denim. Down front seams, around hem lines and outlining pockets, they come on strong for a fresh, clean look. They even sew into a great belt for your denim outfit. Just fold two thicknesses over a buckle and stitch them together along the edges.



Chippewa Indians believed that the aster flower can cure all diseases!

## Recipe Exchange. . .

# Home On The Range

Now that the weather's getting warmer, gelatin and pudding seem more practical than heavy, rich desserts. Our readers have come through again with light, easy summertime dishes. Whether it's custard or jello, this fare will please the whole family.

More requests - this time for Shoo-Fly cake and a good spaghetti and meatball or meat sauce recipe. We also need cheese, cottage cheese, butter and other dairy recipes for our Special June Dairy Month issue. Can anyone fill the order?

Send all contributions to "Recipes", Lancaster Farming, P.O. Box 266, Lititz, Pa. 17543. We'll send you a potholder as our way of saying "Thanks".

Good Eating!

xxx

**Butterscotch Pudding**

1 quart and 1 pint milk
1 cup molasses
1¾ cup brown sugar
1 tablespoon butter
1 teaspoon vanilla
5 eggs
1 cup flour
½ cup water

Mix everything in a kettle and thicken. Makes two dishes.

Rose Hursh
RD1, Ephrata

xxx

**Favorite Egg Custard**

8 well beaten eggs
1½ cups sugar
3 tablespoons vanilla
8 cups milk

Beat well. Pumpkin pie spice may be added if desired. Pour in bakeware cups, glasses etc. and set in casseroles or stainless bowls with hot water to bake.

Bake in hot oven for 45 minutes or until done. Should be at 425 degrees when put in.

Emma Lapp
RD2, Quarryville

xxx

**Coconut, Raisin Rice Pudding**

Mix one cup boiled rice:
1 pint milk
2 eggs, beaten lightly
½ cup sugar
Pinch of salt
1 teaspoon cornstarch
1 cup raisins
1 cup coconut

Mix and put in baking dish. Bake until lightly brown.

Eva W. Nolt
Leola

xxx

**Chocolate Cold Souffle**

2 squares unsweetened chocolate
1 envelope gelatine
3 tablespoons cold water
½ cup 10X sugar
1 cup milk
¾ cup sugar
½ teaspoon salt
1 teaspoon vanilla
2 cups cream

Melt chocolate over hot water. Sprinkle gelatine over cold water to soften. When chocolate has melted, stir in 10X as well as possible. Heat milk until a film shines over top. Stir in chocolate mixture thoroughly. Cook, stirring constantly until mixture reaches boiling point (do not boil).

Remove from heat and mix in softened gelatine, sugar, salt and vanilla. Chill until thick as raw egg whites. At this point, beat until light and airy looking. In separate bowl beat cream until it holds shape. Combine 2 mixtures plus 1 cup miniature marshmallows very gently and pour into dish.

Chill 2 to 3 hours. This can also be put in freezer after it is in dish to be served several days later. Remove from freezer and put in refrigerator approximately 4 hours before serving. Excellent for covered dish suppers.

Mrs. Leon S. Musser
Manheim RD2

xxx

**Apricot Dessert**

1 can apricots
1 can crushed pineapples
2 packages orange jello
2 cups hot water
1 cup combined apricot and pineapple juice
¾ cup small marshmallows

Drain and chill fruit. Save juice. Dissolve jello in hot water. Add 1 cup fruit juice. Fold in fruit and marshmallows. Chill until firm. Spread with fruit cheese.

**Topping**

½ cup sugar
3 tablespoons flour
1 egg slightly beaten
1 cup combined juice
2 tablespoons butter
1 cup cream
¾ cup grated cheese

Combine sugar, flour and beaten egg. Add juice and cook over water till thick. Stir in butter. Cool. Fold in whipped cream. Spread over chilled gelatine.

Rachel K. Fisher
Ronks RD1

xxx

**Raspberry Christmas Ring**

1 small package cream cheese
¼ cup chopped walnuts
1 package frozen raspberries
1½ cups boiling water
1 small package raspberry jello

Cube cheese into 16 squares; roll in walnuts. Place raspberries in mixing bowl. Add boiling water. Stir until raspberries are thawed. Add jello. Stir until dissolved.

Pour into mold. Let cool until partially set. Arrange cheese cubes in jello. Chill until firm. Yields 6 to 8 servings.

Mrs. Paul D. Powell
Petersburg RD1

xxx

**Lime Salad**

First Part:
2 boxes lime jello
4 cups hot water
1 can crushed pineapple (drained)

Second Part:
2 packages whipped topping mix

Add vanilla and one package cream cheese. Mix till smooth, then put on first part when set.

Third part:

Take drained pineapple juice and add water till you have two cups liquid. To that add:
1½ cups sugar
5 egg yolks
4 tablespoons flour

Cook till thickened. Add pinch of salt.

Miss Anna Sensenig
R.D.2
Ephrata

xxx

**Markleys Delight**

1 box lemon jello (3 ounces)
1¾ cups pineapple juice (use water to make enough liquid)
½ pound miniature marshmallows
1 No. 2 can pineapple (crushed)
2 3-ounce packages cream cheese, softened
1 cup cream, whipped
Pecans

Heat juice and put in jello. Add marshmallows, stir until dissolved. Put a little liquid with cream cheese and stir; add more until you can stir it all into the jello mixture. Add pineapple and pecans. Fold in whipped cream. Let cool till set.

Prepare one 3-ounce package red jello and pour on top. Let set.

Mrs. Elam Rutt
R.D.1
Ephrata

xxx

**Whipped Milk Gelatine**

1 3-ounce package fruit flavored gelatine
1 cup boiling water
1 cup milk

Add one cup boiling water to powdered gelatine. Stir until dissolved. Cool until gelatine begins to thicken. Add one cup of milk, a little at a time, beating with a beater constantly. Beat until light and fluffy. Allow to set.

Lizzie Horst
Oxford RD1

NEPPCO Egg Quality School plans were completed recently when this trio met in the Shawmut Inn at Kennebunkport, Maine, site of the 1974 School. Shown above (left to right) are Dr. C. E. Howes, director of the NEPPCO School and head of the Poultry Dept. at VPI&SU; Carl H. Watts, Director of Markets for the State of Maine and head of the NEPPCO School's laboratory; and Richard I. Ammon, NEPPCO executive director who serves as the school's administrator. Dates for the 1974 School are June 9-12. Registration forms and details are available from NEPPCO, 322 Oxford Valley Road, Fairless Hills, PA 19030.

# Spring Nationals Tractor Pulling Dates Announced

Ed Hart, Executive Director of the National Tractor Pullers Association has announced the 1974 Summer Pulling Schedule. First on the circuit will be the Pennsylvania Spring Nationals Tractor Pull, held on June 21 and 22, 1974 at the Buck Tractor Pulls track. This event features a $9,000.00 purse.

Tractor pulling is growing so quickly that a group of men in Pennsylvania are building the first "tractor pulling track" in the U.S. devoted to this sport. Pulls at this new track will run every Friday and Saturday night and all contests will run 100 percent by NPTA rules.

The Spring Nationals will have drivers from across the U.S. and Canada to "inaugurate" the newly built Buck Tractor Pulls track, located near Lancaster, Pennsylvania.

Drivers will be competing in modified and super stock classes with tractors using V-8 racing engines, Allison V-12 aircraft engines and tank engines.

**June 21st - 7:00 p.m. - 7,00** Super Stock, 9,000 Modified, 12,000 Super Stock.

**June 22nd - 7:00 p.m. - 7,000** Modified, 9,000 Super Stock, 12,000 Unlimited.

The Spring Nationals, sponsored by the Buck Tracotr Pullers Association, is one of over forty tractor pulls scheduled for the 1974 season which are sanctioned by the National Tractor Pullers Association, Inc.

**Margarine**

Margarine is one of the products for which the U.S. government has published a standard of identity, and this standard requires that margarine must contain at least 80 percent fat. Diet margarines contain only about half this amount of fat and must be labeled "imitation" margarines.

# Thoughts in Passing

**The article this week was prepared by James L. Green, adult instructor Vo-Ag Dept., Elizabethtown Area High School**

**What Is a Farmer?**

This past year has given me the opportunity to work with one of the most important groups of people in the world today, "The Farmer". So seldom is he seen in the eyes of the public for what he really is that it is no surprise that he is often the target for abuse.

In an era when the evidence of inflation becomes so obvious in the supermarket, it is often the farmer that is blamed. The reasoning behind this is that since the farmer supplies the basic product then he must be receiving a large portion of the profit. What isn't realized is that inflation has caught the farmer in the middle of the cost-price squeeze along with everyone else.

While he has received somewhat higher prices for his products, his expenses for tertilizer, feed, seed, fuel, and equipment have skyrocketed. Many farmers have taken shattering losses, but they don't ask for sympathy, just understanding.

The farmer unlike other businessmen is unable to hold back his production from the marketplace, whether it is week's milk production, a feedlot of steers or grain harvest, it must be moved. The famer's livelihood depends on his ability to produce and maket food. It is vital that the producer and consumer have an adequate understanding of each other or problems develop and spread.

But what does this mean? Is the farmer a money hungry, wealthy, easy-living hayseed? Not on your life. The farmer is a hard-working, honest laborer and businessman. He is often debt-ridden, but he continues to look to the future for better ways to provide for his family and improve his farm. He appreciated his land and is the first to be upset by the wasting of it. The farmer usually has a close relationship to the God that controls the weather and gives new life each spring at Easter time. He expects others to be as Patriotic and concerned for freedom as he has been since George Washington, another farmer, led our country to independence. He looks to the businessman he deals with for dependability and service, and tries to be as honest with the customer he sells to.

Yes, a farmer is this and much, much more. He is a cow and calf doctor, an equipment operator, a mechanic, a manager, and accountant, a taxpayer, a father, a husband or a son. He is also one of the best students of agriculture a teacher could ever find.

# Conservation District Enters Goodyear Contest

The Lancaster County Conservation District has its sights on a first place finish in the 28th Annual Goodyear Conservation Awards Program.

According to Aaron Z. Stauffer, R.D.1, Ephrata, chairman, the district will match its record of service to land users with other districts in the state. An independent judging committee will select the two top districts in the contest sponsored by The Goodyear Tire and Rubber Company in cooperation with the National Association of Conservation Districts (NACD).

Each first place district, in addition to a plaque, will receive expense-paid, vacation study trips for its outstanding cooperator and a member of the governing board. Representatives of the 53 first place districts nationally will be Goodyear's guests on the grand awards tour to Marco Island, Florida, in December.

John S. Yost, R.D.2, Kinzer, the District's outstanding cooperator for the year, also will be honored as part of the awards program.

# Three Promoted At New Holland

A Consumer Services Department will be established by Sperry New Holland Division of Sperry Rand according to Howard A. Downey, company vice president for marketing.

The new department will be headed by Roy G. Cope, 572 E. Jackson Street, New Holland, as consumer services director. Cope, who has been manager of the company's service operation for the past 31 years will report directly to Downey.

Gerald G. Frost, 49 N. Kinzer Avenue, New Holland, has been named to the new position of service training manager. Formerly service administration manager, Frost will have full-time responsibility for planning and implementing the extensive service training programs the company conducts for dealers and the field organization. This will include administration and supervision of the Sperry New Holland service training centers in New Holland, Pa., and Lenexa, Kan.

Roy Cope

George Eastman

Gerald Frost

L. George Eastman, 1406 Palo Blanco Circle, Beeville, Texas, will become service manager within the new department. Eastman is currently a sales representative in Arlington, Texas.

Eastman will have accountability for providing manpower and expertise for special service requests from the field organization and preparing technical service manuals and bulletins. In addition, Eastman's group will work in coordination with the company Engineering Division in developing product improvements and will have responsibility for Consumer Services participation in the quality inspection of assembled machines.

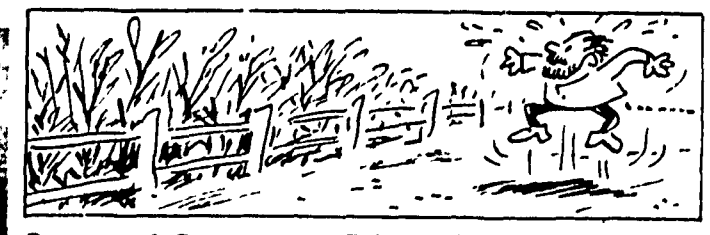
All three appointments become effective May 1.

## Two Men Honored For 25 yrs. Service at New Holland

Sperry New Holland Division of Sperry Rand Corporation is honoring two of its employees who have completed twenty-five years of service with the company this month.

Harry C. Eberly, R.D.2, Narvon, Product Test Supervisor in Product Test; and Paul T. Stevens, 331 E. Cedar Street, New Holland, Truck Driver-Tractor Trailor in Trucking.

They will each be awarded an inscribed watch or clock by the company to commemorate the anniversary



Peasants of Germany and Bohemia have adhered to the custom of leaping high, for as high as they can leap, that's how high their crops will grow!

# Guaranteed Farm Loans Available From FHA

Guaranteed loans by banks and other lending agencies are a new scorce of credit for farmers who cannot otherwise find financial assistance, Roy H. Giesmann, FmHA County Supervisor for Lancaster and Chester counties said today.

"FmHA is already offering borrowers insured loans and loans in which private lenders and FmHA participate We are now adding guaranteed farm loans made by banks and other local lending agencies," Mr. Giesmann explained.

Farmers who need credit can apply for loans either through the Farmers Home Administration or through banks, Federal Land Banks, co-ops, insurance companies, or other private sources of financing. The lending organization makes and services the loan.

Farmers Home Administration will repay private leanding institutions up to 90 percent of any loss on a guaranteed loan, but not more than 90 percent of the orginial principal. Farmers Home also pays the bank the difference between the borrower's interest rate, and the current FmHA guaranteed rate of 90 percent for emergency and operating loans, and 8 percent for farm ownership, soil and water, and recreation loans. Lenders pay FmHA a fee for each loan guaranteed.

FmHA borrowers are now paying 5 percent interest for farm ownership, emergency, soil and water, and recreation loans. The interest rate for operating loans is 6¾ percent.

Mr. Giesmann also indicted that a recent ruling from the Office of the Comptroller General, Washington, D.C., was good news for national banks that participate in the FmHA guarantee program.

"The ruling provides that only the non-guaranteed part of any loan is charged against the bank's lending limit," he said. "This means that, if 90 percent of a $75,000 farm ownership loan is guaranteed, only $7,500 of that loan will be charged against the lending limit."

Mr. Giesmann points out that the applicant must meet the same eligibility requirements for a guaranteed loan as he would for a regular FmHA loan of the same type. Interest rates and repayment terms are the same for guaranteed loans for conventional Farmers Home loans.

In order to make the guaranteed lending process easier and faster, applications, forms, and statement are prepared by regular lenders.

The Farmers Home Administration has many loan programs available for farmers and other rural residents and rural communities. Guaranteed loans made by private lending institutions is one more method of helping the rural development activities of Pennsylvania.

Mr. Giesmann states that applications should be filed with our County Office located at 1383 Arcadia Road, Lancaster, Pa. 17601.

# Homemakers Camp Dates Announced

Sunday, August 25 to Tuesday, August 27 will be the dates for Extension Homemakers Camp for this year. Homemakers from Lebanon, Berks, Lancaster, York, Dauphin, Cumberland, and Adams may attend. Cost for meals, registration, a bed in a cabin is $14.00.

Crafts, speakers recreation and fellowshi; are part of the camp. Location is Camp Swatara, north of Frystown, only about 10 miles from Lebanon.

If you are interested in more information, contact Lebanon County Chairman, Mrs. Mark Stoddard, Route 1, Jonestown or the Extension Office. Deadline for registration is August 12, but don't put it off!

Camp policy requires that you must pay full fee regardless of the length of time spent at camp - all campers are encouraged to attend the full program.

**Use The Coals**

Use the coals not fire, to cook meat on an outdoor grill Broiling at low to moderate temperature makes for juicier and more tender meat It also means more meat to serve and enjoy since high temperatures increase cooking losses

# Little International Livestock Expo Held at Penn State

Ronald C. Miller of State College captured the grand champion showmanship title with Jeffrey McKissick of Slippery Rock winning the reserve champion showman award in the 57th Little International Livestock Exposition April 27 at The Pennsylvania State University. The show was sponsored by the Block and Bridle Club.

In the beef cattle division, Mary Lou Altman of Greensburg was named both champion fitter and reserve champion showman. Deborah M. Serecin of Aliquippa was the reserve champion fitter, with Dennis E. Stockdale of Dayton taking the champion beef showman award.

Ann Swinker of Brownsville was named champion horse showman, with Carol L. Rumsey of Media winning both the reserve champion horse fitter and showman titles. Joan H. Hoffman of Allentown was named the champion fitter in this area.

From Bloomsburg, Susan Houston won the reserve champion sheep showman award, and Steven C. Pellman of Camp Hill was champion fitter. Ronald C. Miller of State College was both champion sheep showman and reserve champion fitter.

Champion swine showman honors were received by Jeffrey McKissick of Slippery Rock with the reserve champion showman title going to Randall R. Groff of State College. John F. Graeb of Erie was the champion swine fitter with Karen L. Richard of Elysburg as the reserve champion fitter.

Other presentations made were to winners of the Intracollegiate Livestock Judging Contest held in conjunction with the Exposition and sponsored by the Penn State Block and Bridle Club. In the amateur division there was a championship tie between Michael P. Morris of Lansdowne and Jeffrey McKissick of Slippery Rock. Richard L. Beck, Jr. of Seven Valleys won the professional division. The newly instituted 4-H category was won by a Lancaster County 4-H Team with the high junior judge being Gregory Snyder from Lehigh County and high junior in oral reasons was Carl McCullough of Mercer County.

At the awards banquet following the Exposition, Elaine M. Palumbo of Sharon received a scholarship sponsored by the Block and Bridle Club for scholastic improvement. The club advisor, Professor Glenn R. Kean, was given special recognition for his untiring support and leadership.

Dr. Grant W. Sherritt, swine coordinator and instructor at Penn State, was honored at the banquet for his contributions to and sincere interest in the welfare of the student body involved in agriculture. The Exposition was dedicated to Dr. Sherritt.

Edgar E. Fehnel, Vice President of Marketing Planning for Agricultural Products Worldwide, Elanco Products Company, Indianapolis, Ind., received the Distinguished Alumni Award from the Department of Animal Science.

# More Soybean Funds Needed

Additional research funds are needed to increase soybean yields if the U.S. is to continue to meet increasing worldwide protein needs, according to the American Soybean Association (ASA).

In testimony before the U.S. House and Senate subcommittees investigating the needs for additional agricultural research funds, ASA said a relatively small investment in soybean research can result in benefits to consumers and farmers.

"By making a small investment in soybean research relative to the total importance of soybeans to the U.S., we can increase productivity, improve the standard of living throughout the world and improve our balance of payments," said Nick Rose, ASA spokesman.

The Agricultural Research Service is requesting Congress appropriate an additional $1.4 million for soybean research. This additional money will be supplemented by $1 million from soybean growers who support soybean research through their own contributions.

"Soybean production is in its infancy in relation to other U.S. crops," Rose said. "But soybeans have suddenly become the most important crop in terms of cash returned to the farmer."

More efficient production and weed control are specific areas requiring further research, according to ASA testimony. The cost of producing a bushel of beans has risen 44 percent in the past year to $3.60 a bushel.

Efficient machinery is one answer. "We must have machinery that is designed specifically for soybean production and handling," Rose said.

"At today's prices, soybean producers lose approximately $900 million in soybeans that are grown to maturity, but to not reach the market because of inefficient combines and harvesting methods," he said.

Efficient herbicides are also needed. In 1972 weeds cost soybean farmers at least $500 million in potential profits, according to ASA figures.

"Besides developing more efficient ways to raise soybeans and eliminate weeds, disease-resistant plants need to be developed or chemicals must be introduced that control the diseases," Rose pointed out.

Phytophthora root rot, brown stem rot, seedling diseases and others cause an estimated 12 percent reduction in production annually, or approximately $1 billion per year.

# PUBLIC SALE
## OUTSTANDING COUNTRY REAL ESTATE
## 68 ACRE FARM
## SATURDAY, MAY 11, 1974
1:30 P.M.

**Located at Route 5 Lebanon, West Cornwall Township, Lebanon County, Penna. Approx. 15 miles East of Hershey or 4 miles South of Lebanon. Proceed West of Route 72 at Quentin along Route 322 approx. 1.5 miles and turn right onto Spangler Road or South of Lebanon approx. 4 miles on Route 341 and turn onto Spangler Road and proceed to the farm.**

This farm is an outstanding opportunity for anyone desiring to move to the country with plenty of wide open spaces and a multitude of different uses. Ideally located and could be used for either a steer fattening operation or horse raising purposes.

Improvements include large approx. 100 yr. old 2 and ½ story limestone house with attached frame addition with laundry, recreation room, ½ bath and 2 car garage. This house has a large spacious kitchen with over abundant cupboard and work space, 2 large living rooms, 4 bedrooms, full bath and large attic. House has large ground basement and separate basement for coal stoker hot water heat furnace. Home has slate roof, storm windows, never failing well, 2 garden areas, and large landscaped yard.

Other buildings include large bank barn presently being used for steer fattening operation, with a 10' x 50' concrete stave silo and a large 20' x 52' concrete silo with unloader and large bunk and feedlot area. Stream flows through the barnyard and water is piped to the barn. This would make an ideal barn for horses and the inside could be used for a year a round riding area.

Lots of board fence surrounding these buildings and adding to this attractive gentleman's farm which is sure to please the very discriminating buyer. A lovely place to raise a family or for your retirement, so plan now to attend this sale.

Inspection on Saturdays, April 27 or May 4 or by calling 717-272-5101.

# BUSHY PARK PRODUCTION SALE

Edward C. Anderson, Wake, Virginia, Owner

## THURSDAY, MAY 9th - 12:30 NOON

At the Ass'n. Sales Pavilion, Lancaster, Pa.

**79 HEAD of PUREBRED GUERNSEYS - 2 Bulls (Service Age)**
**40 COWS - 21 BRED & 16 OPEN HEIFERS.**

All Vaccinated - Bangs & T.B. Cert. - Tested for Anaplasmosis

A representative selection of more than half the herd, which last year was top in the country (75 to 125 records) with an average of:

13,728 lbs.M - 604 lbs. F-ME-305-2x

The last several years Bushy Park has become famous in selecting top cattle in many of the sales throughout the U.S. They have also more than held their own in the show ring.

Naturally, to put the best foot forward they have selected some of the outstanding cattle in the herd and many are descendants of top animals they purchased.

In sale are: 4 cows over 11,000 lbs., 6 over 12,000 lbs., 7 over 13,000 lbs., 8 over 14,000 lbs., 3 over 15,000 lbs., and 2 over 16,000 lbs. of milk. Top sires represented are: M. B. Halyard; W. G. Darimost; Woodacres Flash; Woodacres M. Chief; Lyrene M. R. Prince and Housleys D. Fayvor.

You can make a fine selection of top foundation stock from calves on up. Breeding is of the best and condition of cattle outstanding.

**It is not the best time for a sale when farmers are busy, but in the long run you will make more money taking the day off and building your Guernsey herd, which after all is the main cog in your operation to make money.**

SALE MANAGED BY: Pa. Guernsey Breeders' Ass'n., Camp Hill, Pa. 17011 and the Merryman Company, Sparks, Md. 21152.

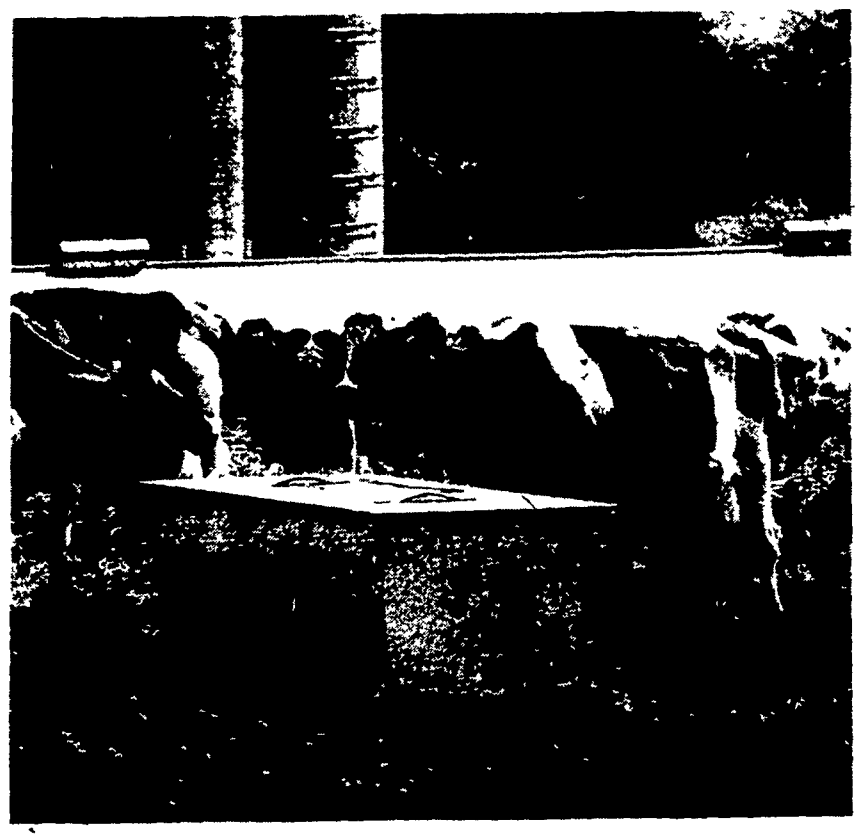
# AGWAY

## Liquid Protein Supplement (LPS). . .

## milk check protection

## when your cows go on pasture



Although high in protein at the start, spring pastures deteriorate rapidly — and your cows will know it before you do. You will not be aware of it until milk production starts to suffer. And it may take more time and money than you like to bring production back up again. What can you do to prevent pasture slump?

**Put an Agway LPS feeder in your pasture**

Agway LPS gives you continuous insurance against pasture slump. If you've fed LPS before, you may have noticed that your cows consume less LPS when first put out on pasture. That's to be expected. They're getting abundant protein from the grass.

But you've probably also noticed that, as pastures mature and protein availability decreases, cows visit the LPS free-choice feeder more often and stay longer.

*Your cows are demonstrating exactly what Agway has proven through research at the Agway Farm Research Center at Fabius, N.Y. Dairy cows do adjust LPS consumption in response to altered protein intake in their ration.*

This has been proven true, however, only in the case of Agway LPS. It does not necessarily apply to various other liquid supplements on the market. Previous work at Fabius showed that changes in formulation significantly affect free-choice intake of liquid supplements.

**For details about what LPS can do to improve your profit picture, call your local Agway and ask for a Farm Enterprise Salesman.**
